<b>Subject Overview:</b>	This subject will introduce the field of urban morphological analysis and a range of techniques for urban mapping. It will include techniques for mapping and analysis of various layers of urban data, for instance: figure/ground, grain size, building and public space typology, infrastructure, functional mix, movement networks, density, streetlife, character, viewsheds and pools of use. The focus will be on an understanding of how various techniques of urban mapping can creatively contribute to different urban design concepts, approaches and outcomes within a global context.																				
<b>Objectives:</b>	At the conclusion of this subject students will be able to: # understand the role and importance of morphological mapping for urban analysis and design;																				

	<ul style="list-style-type: none"> <li># read and critique a layered morphological database;</li> <li># build a simple layered database for an urban site;</li> <li># understand the use of mapping as a creative tool for urban design.</li> </ul>
<b>Assessment:</b>	Graphic and written submissions throughout the semester to the equivalent of 5000 words as follows: Assignment 1, due week 4 (25%). Assignment 2, due week 8 (25%). Assignment 3, due week 12 (50%).
