<b>Subject Overview:</b>	This subject is primarily designed to support students who plan to undertake one of the Research Project subjects offered in the Faculty. The emphasis is on helping these students define a research topic, survey the relevant literature, use results of their literature search to define research questions and to select appropriate research methods to answer these questions. The classes provide an overview of some commonly used methods for data collection and analysis, the process undertaken in designing and conducting a research project, and writing an academic research project report. Concurrent with this subject students will need to discuss details of specific methods and literature within their individual topic areas with their research project supervisors.						
<b>Objectives:</b>	<ul style="list-style-type: none"> <li># Knowledge of techniques and skills involved in the research process</li> <li># Ability to analyse problems and shape a research project to address the issues identified</li> <li># Ability to write and make oral presentations on research</li> </ul>						
<b>Assessment:</b>	A total of 5000 words in three written assignments (worth 80% of the unit grade) and a 15 minute oral class representation (worth 20% of the unit grade). The assignments consist of a draft introductory chapter (1000 words, due in week 7), a research design/methods chapter (1000 words due in week 10), and a literature review chapter (3000 words, due in week 12) that will be incorporated into the student's final research project report, if applicable.						
<b>Prescribed Texts:</b>	David Evans and Paul Gruba, How to Write a Better Thesis, 2nd edition, October 2002, MUP, 198p.
