Coordinator:	Dr Nicholas Williams						
Contact:	Email: julianh@unimelb.edu.au (mailto:julianh@unimelb.edu.au) Phone: 8344 8841						
Subject Overview:	<p>The subject allows students to conduct an original research project, under supervision to be approved by a subject Coordinator. The work will be equivalent to lecture and practical based subjects worth 50 points. The content and extent of the project will be determined by a Coordinator, in collaboration with the student and the supervisor.</p> <p>The work would ordinarily include a review of a body of scientific literature, together with a critical evaluation of research or experimental protocols, and the development of research methods, implementation of a mathematical model, completion of an original experiment, or a thorough exploration of a scientific issue. Projects would ordinarily include a component of original research well beyond a review or critique. Projects would involve regular 1-hour discussion groups where students report on progress, major problems and plans. For substantive reasons, this research project requires more than one semester to complete.</p>						
Objectives:	Information Not Available						
Assessment:	A thesis/body of work of 20,000 words maximum (75%) – by three weeks before end of second semester, 10% project proposal (poster session) – week 6 of first semester and 15% final seminar of 15 minutes – end of second semester						
Prescribed Texts:	Information Not Available						
Breadth Options:	This subject is not available as a breadth subject.
