Subject Overview:	Anthropology explores the different ways people live their lives. In this subject, an introduction to foundational knowledge in the discipline, students will be exposed to a variety of social and cultural forms around the world and the methods and theories developed to understand them as diverse expressions of a shared human condition. Topical issues that will be encountered include how different peoples around the world experience and react to pleasure, suffering and death. use ritual, religion and magic to understand and change their worlds. organise their sexual and family lives and their friendship networks, create and maintain their identities (individual, gendered, ethnic and youth sub-cultural) and maintain and resist the relations of power in which they are all enmeshed. On completion, students will have developed a foundational knowledge of the discipline of anthropology. They will also have developed an appreciation of both anthropology's distinctiveness and its complementarity with other social science disciplines such as sociology, criminology, geography, political science, history, philosophy and gender studies. Finally, and most importantly, they will, through cross cultural comparison, understand the peculiarity of their own taken-for-granted ways of being.
