

EDUC90667 Teaching Space and Measurement

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2010, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus.
Time Commitment:	Contact Hours: 24 hours. Total Time Commitment: 120 hours.
Prerequisites:	Enrolling students must have a teaching qualification either: # an undergraduate degree and a fourth-year level education qualification, or equivalent, or # a four-year education degree, or equivalent.
Corequisites:	None.
Recommended Background Knowledge:	Knowledge of mathematics to Year 10 level, and general knowledge of teaching practices in any subject.
Non Allowed Subjects:	None.
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Coordinator:	Dr Jill Vincent
Contact:	Education Student Centre
Subject Overview:	This subject explores the content and pedagogical content knowledge needed to teach the Space and Measurement strands in junior secondary mathematics, including units and conversions, area and volume, practical measuring and measurement error, trigonometry, visualisation in 2D and 3D, transformations and geometry. Participants will study research on students' mathematical thinking and effective teaching methods, analyse major teaching resources including dynamic geometry, instructional software and applets. Engaging students in mathematics and developing a productive disposition; equity in mathematics learning (e.g. gender). Practical teaching tasks will complement theory. Students will be expected to participate in intensive teaching, completion of weekly exercises to satisfactory standard and regularly contribute to the electronic forum.
Objectives:	On completion of this subject, participants will be able to: # give overview of the content of this strand of mathematics # demonstrate insight into student thinking # review the options for teaching of the strand and relevant research # explain how the goals of working mathematically can be achieved through this strand # discuss critical pedagogical issues, especially related to engaging students, achieving equity and developing a productive disposition.
Assessment:	Report (2000 words equivalent) due mid semester (40%) Unit plan and related pedagogical analysis (3000 words) due end of semester (60%)
Prescribed Texts:	Goos, M., Stillman, G., & Vale, C. (2007). Teaching secondary school mathematics: Research and practice for the 21st century. Sydney: Allen & Unwin Further readings will be provided. Special requirement Years 7-10. Handheld calculator or computer software recommended for use in the VCE subject Further Mathematics.

Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<ul style="list-style-type: none"># Be skilled communicators who can effectively articulate and justify their mathematics teaching practices;# Understand the significance of developing their mathematics teaching practice on the basis of research evidence;# Demonstrate mastery of the subject matter for this area of teaching and of general principles of effective teaching and learning in a mathematics context, including with technology.
Related Course(s):	Postgraduate Certificate in Mathematics Teaching (Years 7-10)
