

## ENEN90025 Design of Environmental Systems

<b>Credit Points:</b>	12.50
<b>Level:</b>	9 (Graduate/Postgraduate)
<b>Dates &amp; Locations:</b>	2010, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus.
<b>Time Commitment:</b>	Contact Hours: Twelve hours of lectures, thirty-six hours of design classes and three-hours of site visits. Total Time Commitment: 120 hours per semester
<b>Prerequisites:</b>	None
<b>Corequisites:</b>	None
<b>Recommended Background Knowledge:</b>	None
<b>Non Allowed Subjects:</b>	<b>421-482 Analysis &amp; Design-Environmental Systems (/view/2010/421-482)</b>
<b>Core Participation Requirements:</b>	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: <a href="http://www.services.unimelb.edu.au/disability/">http://www.services.unimelb.edu.au/disability/</a>
<b>Coordinator:</b>	Dr Dongryeol Ryu
<b>Contact:</b>	Melbourne School of Engineering Ground Floor Old Engineering Building #173 The University of Melbourne VIC 3010 AUSTRALIA General telephone enquiries + 61 3 8344 6703 + 61 3 8344 6507 Facsimiles + 61 3 9349 2182 + 61 3 8344 7707 Email: <a href="mailto:eng-info@unimelb.edu.au">eng-info@unimelb.edu.au</a> ( <a href="mailto:eng-info@unimelb.edu.au">mailto:eng-info@unimelb.edu.au</a> )
<b>Subject Overview:</b>	In this subject, students develop and practice their capabilities of problem identification and finding solution for a broad range of practical problems they will encounter in their career. Typical problems may include irrigation and drainage design, hydrogeological problems such as landfill containment, catchment management, stream rehabilitation and rehabilitation of degraded land such as mine sites. Particular emphasis will be placed on how projects are managed/implemented within each working group and how group members are making coordinated efforts to achieve the design goals.
<b>Objectives:</b>	This subject aims to provide students with training and experience of problem solving and resources management by assigning them to a range of engineering problems that require group-based work.
<b>Assessment:</b>	Three written group reports and participation (30% each)One assignment not exceeding 20 pages each inclusive of diagrams, tables, computations and computer output (10%)Students must attend the site visit
<b>Prescribed Texts:</b>	None
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>

<b>Generic Skills:</b>	<ul style="list-style-type: none"> <li># Ability to identify the dominant processes in time and space that govern the flux of water, soil and/or other environmental variables for a given scenario.</li> <li># Ability to describe integrated conceptual and/or mathematical models of the dominant processes.</li> <li># Given basic data about the scenario, capability to generate predicted states of the system as a result of natural or anthropogenic disturbances to the system.</li> <li># Ability to interpret the predicted states into a form useful for management decisions to be made about the system.</li> <li># Ability to make coordinated efforts with group members to achieve project goals.</li> </ul>
<b>Notes:</b>	Subject is offered for the last time in 2010
