Subject Overview:	By lecture and demonstration students are taught basic processes related to intaglio and relief printmaking. Intaglio presents various techniques such as hard ground, soft ground and aquatint and the essential aspects of preparation and printing plates. Aspects of health and safety and appropriate studio workshop procedure are discussed. After the consolidation of processes, students are taught on an individual basis. Relief printing presents the main modes of printing such as lino cut, wood cut and collagraph and the preparation for the printing of these processes. Aspects of health and safety and appropriate studio workshop procedure are discussed. After the consolidation of processes, students are taught on an individual basis. Objectives: On completion of this subject students should be able to: # comprehend and apply the technical and procedural fundamentals of intaglio and/or relief processes in printmaking; and # form a conceptual relationship between the methodologies, processes and techniques of printmaking and their area of specialisation.
Objectives:	On completion of this subject students should be able to: • comprehend and apply the technical and procedural fundamentals of intaglio and/or relief processes in printmaking; and • form a conceptual relationship between the methodologies, processes and techniques of printmaking and their area of specialisation.
Assessment:	Assessment is based on a folio of the student's work, submitted at the end of the semester, containing a requisite number of works completed during the semester, including finished works, studies, proofs, working drawings and any other relevant material the student may decide to submit (100%).
Prescribed Texts:	Nil
Recommended Texts:	Nil
