Coordinator:	Andrea Krelle, andrea.krelle@mcri.edu.au								
Contact:	Lara Cullen, lara.cullen@rch.org.au								
Course Overview:	<p>The Master of Adolescent Health & Welfare program will provide a unique learning opportunity for students to develop in-depth knowledge and advanced skills in the specialist discipline of adolescent health and well being. The research component (subject and thesis) will require students to propose a research question, choose and design a methodology for a relevant adolescent health issue. They then conduct the investigation under the guidance of a supervisor and apply what is learnt to their own workplace and practice. This research cycle, from conception to implementation and adaptation, serves as a rigorous exercise in academic excellence.</p>								
Objectives:	<ul style="list-style-type: none"># Further develop and apply critically reflective, evidence-informed approaches to adolescent health and welfare practice, program development and policy analysis;# Analyse and critically evaluate contemporary theories of adolescence and adolescent development (including historical and cultural contexts), to enhance own practice in working with young people, families, communities and agencies;# identify national and international adolescent health issues and trends and relate these to the broader socio-environmental contexts impacting on the health and wellbeing of young people;# identify the principles associated with 'micro' and 'macro' approaches to practice and use these to develop enhanced prevention and intervention strategies when working with young people, families, communities and agencies;# analyse, evaluate and apply ecological models of resiliency, risk and protection in adolescent health;# engage young people, families and other professionals in the development and implementation of strategies to promote adolescent health and wellbeing;# Demonstrate a commitment to critical enquiry and evidence-based practice so as to maintain currency with contemporary debates and continuously inform practice;# Analyse and reflect on national and international adolescent health issues and trends as they relate to particular communities and professional practice settings;# Further develop and apply principles associated with 'micro' and 'macro' approaches to practice in adolescent health and welfare;# Plan, implement and evaluate effective prevention, early intervention and intervention strategies relevant to work with young people. <p>In addition to the objectives outlined above, the Master of Adolescent Health & Welfare is designed to enable students to:</p> <ul style="list-style-type: none"># Further develop and apply holistic, evidence informed approaches to practice with young people in a cross-sectoral and interdisciplinary context;# Develop the ability to design and undertake advanced research at a postgraduate level;# Prepare an adolescent health minor thesis that contributes to our understanding of young peoples health and wellbeing.
