Coordinator:	Professor Danny Samson
Contact:	Melbourne Consulting and Custom Programs Level 3, 442 Auburn Rd Hawthorn 9810 3300 Email: mccp.enquiries@mccp.unimelb.edu.au
Course Overview:	<p>The program development reflects a specialist niche market within the greater leadership and management area that reflects the logistics and supply chain sector needs in Australia and its region. The program enrolment requires a commitment by the students' employer to provide access to live data so that their assessment involves company activity and strategy to ensure that this program is grounded and driven by industry needs.</p> <p>Supply Chain Management (SCM) involves the management and flow of goods, information and funds within and between companies, from source to consumer. It comes principally as an extension of operations management, which is concerned with optimally allocating resources within the firm, to take in a broader domain of optimization.</p> <p>The course is designed for those who wish to advance their knowledge and careers in SCM, who may already be working in that sector or in related functions in transport or in SCM functions in any industry. These are people who have at least two years of work experience. It is expected that students will come from retailing, manufacturing, mining, transport, public agencies, defence and primary industry sectors.</p>
Objectives:	<p>Learning goal 1</p> <p>Graduates of this degree will be knowledgeable of all aspects of the supply of goods and services, including procurement, transformation operations and transport/ distribution including the management of information in these areas</p> <p>Learning objectives to achieve these goals. On successful completion of this course, students should be able to:</p> <ul style="list-style-type: none"> • Apply the concepts, knowledge and skills of Supply Chain Management • Apply the basic theoretical framework of Supply Chain Management and basic concepts in logistics, distribution and procurement. <p>Learning goal 2</p> <p>Graduates of this degree will be professional in their approach to Supply Chain Management</p> <p>Learning objectives to achieve these goals. On successful completion of this course, students should be able to:</p> <ul style="list-style-type: none"> • Effectively build, manage and improve Supply Chain Management operations • Discuss the nature of Supply Chain Management in organisations and the role that Supply Chain Management plays in society • Explain the principles and practice of Supply Chain Management which influence the capacity to compete effectively in manufacturing and service operations. • Retrieve information and apply this in relation to practical problems in leadership and managerial decision making of Supply Chain Management. <p>Learning goal 3</p> <p>Graduates of this degree will be analytical in all aspects of Supply Chain Management</p> <p>Learning objectives to achieve these goals. On successful completion of this course, students should be able to:</p> <ul style="list-style-type: none"> • Use the micro- and macro- frameworks and strategic analysis necessary for professional managers to be effective in leadership, decision making and resource allocation in respect of Supply Chain Management .

	<ul style="list-style-type: none"> Analyse and problem solve in relation to organisations Apply basic analysis methods to SCM decision trees and linear programming, and project management and optimisation.
