Subject Overview:	This subject explores different models of strategy making and examines some of the difficulties involved in managing strategic change. Traditional models see strategy making as a straightforward, rational, 'top-down' process. Empirical work shows, however, that the formulation and implementation of strategies is a complex process, which is affected by political, cognitive, and contextual factors. Top managers can formulate a detailed strategic plan; but plans are not always put into practice nor are the plans that are put into practice necessarily successful. The subject commences by reviewing traditional models of strategy making where strategies are formed to derive a competitive advantage that enables the organisation to respond to environmental threats and opportunities. Students will then be introduced to other models, including emergent, political, logical incrementalist, configurational and sense-making perspectives, to explore how strategic change is managed.
Objectives:	Information not available.
Assessment:	An end of semester take home examination (60%) and class assignment(s) totalling not more than 4000 words (40%)
Prescribed Texts:	You will be advised of prescribed texts by your lecturer.

Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<ul style="list-style-type: none"># High level of development: oral communication; written communication; problem solving; application of theory to practice; interpretation and analysis; critical thinking; synthesis of data and other information; accessing data and other information from a range of sources; receptiveness to alternative ideas.# Moderate level of development: collaborative learning; team work.# Some level of development: evaluation of data and other information; use of computer software.
Related Course(s):	Graduate Diploma in Management Studies
