Subject Overview:	This subject examines the rise of the new information technologies and e-business within a wider organisational, social and historical context. It relates them to the emergence of "information-based" societies, where work, organisations and society are said to be changing. In particular, it examines some of the competing claims made about such developments and examines the actual impacts of new information technologies and e-business on a range of issues that may include work organisation and behaviour, employee relations, relations between organizations and their consumers, and organisational strategy and structure. It also looks at the broader social and ethical implications for the wider society and globalisation.
Objectives:	On successful completion of this subject, students should be able to: <ul style="list-style-type: none"> # Have knowledge and comprehension of the emergence of information technology and e-business in a wider context; # Be able to analyse and evaluate the different effects that they have on organizations and societies; # Be capable of applying critical management theory to real and hypothetical situations.
Assessment:	Minor assignments due during semester totalling not more than 4000 words (50%) One major assignment totalling not more than 4000 words (50%)
Prescribed Texts:	None
