

PHTY90025 Cardiorespiratory Rehabilitation

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2010, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus.
Time Commitment:	Contact Hours: 30 hours of lectures and seminars. Total Time Commitment: Students are expected to undertake a number of hours of self directed learning in this subject. Approximately 50 hours of self directed learning is suggested.
Prerequisites:	For Masters by Coursework: 513-662 Cardiorespiratory Science For Postgraduate Certificate: 513-699 Physiotherapy Professional Portfolio and 513-662 Cardiorespiratory Science
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	None
Coordinator:	Ms Annemarie Lee
Contact:	Dr Annemarie Lee
Subject Overview:	This subject builds on the knowledge and skills gained in 513-662 Cardiorespiratory Science. This subject will enable students to build on their undergraduate knowledge and clinical experience in the areas of evidence based practice, program evaluation, cardiorespiratory outcome measures, exercise in cardiorespiratory dysfunction, efficacy of components of rehabilitation, medical management of related diseases including pharmacological management and oxygen therapy, nutrition, ageing, osteoporosis, marketing and setting up new rehabilitation programs and running a safe and effective exercise class. It is designed to allow students to refine clinical reasoning and manual skills in the clinical setting, including patient assessment and treatment, and education of caregivers and other health professionals. Students will be expected to gain experience under supervision in the management of both medical and surgical patients.
Objectives:	Refer to Specific Skills as outlined in Generic Skills.
Assessment:	Written assignment of 2,000 words (30%), Oral presentations totaling (30%)Skills examination totaling (40%)
