<b>Subject Overview:</b>	This unit provides students with an integrated overview of the ways in which different theories and disciplinary perspectives have informed public health principles and practices both in the past and present. The unit provides the foundations for a contextual understanding of the specific methods of public health research, policy development and program planning and implementation. Principles and Practice of Public Health is a "glue" unit for the study of public health, drawing linkages between areas that may at first sight appear quite disparate.
<b>Objectives:</b>	At the completion of this unit, you should be able to: <ul style="list-style-type: none"> <li># Discuss the historical underpinnings of contemporary public health theory and how these events have shaped current theory and practice of public health;</li> <li># Understand how political movements and events have shaped public health including human rights, imperialism, wars, famines and the development of global health organisations;</li> <li># Describe the diversity of public health, its sources of knowledge, policies and regulations;</li> <li># Identify the key influences of different disciplinary perspectives on public health theory and practice.</li> </ul>
<b>Assessment:</b>	Two 1,000-word minor assignments (20% each) one 3,000-word major assignment (60%)
