Coordinator:	Assoc Prof Carol Hulbert
Contact:	Dr Carol Hulbert
Subject Overview:	This subject aims to present major approaches to psychological disorders, in which psychopathology is contrasted with 'normal' functioning. While reference is made to various theoretical approaches to the aetiologies of disorders/problems, the major focus is on recognising the clinical pictures of common psychological disorders/problems that occur in a variety of settings, including depression, the anxiety disorders, and substance abuse/dependence.
Objectives:	The subject aims to introduce students to various competing theories of aetiology and maintenance for psychological problems/disorders the commonly present to clinicians: <ul style="list-style-type: none"> # to provide students with an overview of the important criteria by which practising psychologists evaluate theoretical and treatment models; and # to develop familiarity with clinical presentations, co-morbidity, prevalence and incidence data, course and outcome, response to treatment for the psychological disorders.
Assessment:	A mid-semester one hour test (50% of assessment) and an end-of-semester one-hour test (50% of assessment).
Prescribed Texts:	None. A series of readings will be provided.
Recommended Texts:	American Psychiatric Association (1994). Diagnostic and Statistical Manual (DSM-IV). Washington, D.C: Author. Barlow, D.H. & V.M. Durand. (2002 or 2005) Abnormal Psychology: An Integrative Approach. Belmont, California: Wadsworth, Thomson Learning.
