

SWEN90002 Engineering for Internet Applications

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2010, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus.
Time Commitment:	Contact Hours: 36 hours, made up of 12 three-hour lectures (one per week) Total Time Commitment: 120 hours
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	Familiarity with software development for internet applications
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Coordinator:	Dr Aaron Harwood
Contact:	Melbourne School of Engineering Office Building 173, Grattan Street The University of Melbourne VIC 3010 Australia General telephone enquiries + 61 3 8344 6703 + 61 3 8344 6507 Facsimiles + 61 3 9349 2182 + 61 3 8344 7707 Email eng-info@unimelb.edu.au (mailto:eng-info@unimelb.edu.au)
Subject Overview:	Topics covered include: Web software architectures; languages and standards for data and applications on the World Wide Web; protocols for data exchange, program invocation, self-description, and discovery that form a basis for Web Services. Technologies discussed include HTML, HTTP, XML, SOAP, and WSDL. The development platform will be either Java Web Services platform or Microsoft's .NET. The use of these technologies for creating sample client-server and distributed applications will also be discussed.
Objectives:	On completion of this subject students should be able to; # Describe the concepts, technologies and standards underpinning the World Wide Web and its applications.
Assessment:	Two projects due around weeks 7 and 12, expected to take approximately 36 hours (40%), class participation (20%), and an end-of-semester written examination not exceeding 3 hours in duration (40%).
Prescribed Texts:	None

Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	On completion of this subject students should be able to: <ul style="list-style-type: none"># Undertake problem identification, formulation, and solution# Utilise a systems approach to complex problems and to design and operational performance# AbiManage information and documentation# Communicate effectively, with the engineering team and with the community at large
Related Course(s):	Bachelor of Computer Science (Honours) Bachelor of Engineering (Software Engineering) Master of Engineering in Distributed Computing Master of Information Technology Master of Software Systems Engineering Postgraduate Certificate in Engineering
