Subject Overview:	This subject will focus on the biological, psychological and social factors which influence women's health in the different phases of their lives. The life cycle will be considered from a number of perspectives. The different life phases will be examined with emphasis on adolescence, pregnancy, postpartum and parenting, midlife and older age. Consideration will also be given to the transitions between life phases and to some aspects of women's lives, which change across the life cycle such as menstruation, sexuality and violence
Objectives:	Students who successfully complete this subject will: <ul style="list-style-type: none"> • Comprehend the importance of biological, psychological, social and cultural influences on women's health in different phases of the lifecycle • Appreciate the importance of transitions between life phases and the manner in which some aspects of women's lives change across the lifecycle • Have advanced critical thinking and analytical skills of health issues affecting women during the life course • Have enhanced writing skills
Assessment:	Class paper and written assignments totalling 4,000 words
Prescribed Texts:	NA
Recommended Texts:	Course materials are provided to all participants

Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Students who successfully complete this subject will: <ul style="list-style-type: none">• Comprehend the importance of biological, psychological, social and cultural influences on women's health in different phases of the lifecycle• Appreciate the importance of transitions between life phases and the manner in which some aspects of women's lives change across the lifecycle• Have advanced critical thinking and analytical skills of health issues affecting women during the life course• Have enhanced writing skills
