

Marine Biology

Year and Campus:	2011																														
Coordinator:	Dr Stephen Swearer Department of Zoology																														
Contact:	Email: s.swearer@unimelb.edu.au (mailto:s.swearer@unimelb.edu.au)																														
Overview:	A marine biology major will provide the springboard for students entering careers or research in the following areas: marine ecology, fisheries, commercial aquaculture, marine environmental monitoring and assessment, marine science education and tourism. Graduates will be prepared for these pathways by developing specialised knowledge about marine biological systems, as well as practical experience, which are crucial to being prepared to make contributions in laboratories, or in consulting roles in the marine environmental industry.																														
Objectives:	This major will integrate knowledge from a range of disciplines from the biological (botany, zoology) to physical sciences (chemistry, geography, oceanography), by enabling students to complete a sequence of specialist subjects in each, as well as integrated subjects in which the students develop an understanding of the application of ecological principles and environmental management strategies to solving current problems in marine biology. Students will gain experience preparing them for the workplace by participating in field-based and group-based research projects.																														
Structure & Available Subjects:	Completion of 50 points of study at Level 3.

Subject	Study Period Commencement:	Credit Points:																													
ZOOL30008 Experimental Marine Biology	February	12.50																													
BOTA30001 Marine Botany	December	12.50																													
BOTA30007 Marine Phytoplankton of Australia	November	12.50																													
Subject	Study Period Commencement:	Credit Points:																													
ECOL30006 Ecology in Changing Environments	Not offered 2011	12.50																													
CHEM30012 Analytical & Environmental Chemistry	Semester 2	12.50																													
ECOL30005 Applied Ecology	Semester 2	12.50																													
GEOG30001 Coastal Landforms & Processes	Semester 1	12.50																													
GEOM30009 Imaging the Environment	Not offered 2011	12.50																													
Notes:	This major is available to new generation Bachelor of Science students (B-SCI). It is also available to Bachelor of Science students who commenced prior to 2008. The published structure of this major includes subjects available in the current year. Pre-2008 Bachelor of Science students who completed one or more Level 3 science subjects towards this major prior to 2010 should contact the EPSC for advice on appropriate subjects to complete this major.
