

234AA Master of Design

Year and Campus:	2011 - Parkville
CRICOS Code:	019989E
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Level:	Graduate/Postgraduate
Duration & Credit Points:	100 credit points taken over 12 months full time. This course is available as full or part time.
Coordinator:	Professor Philip Goad
Contact:	<p>Environments and Design Student Centre Ground Floor, Baldwin Spencer (building 113)</p> <p><i>Enquiries</i> Phone: 13 MELB (13 6352) Website: http://www.msd.unimelb.edu.au (http://www.msd.unimelb.edu.au/)</p>
Course Overview:	<p>The Master of Design is highly flexible and allows students to select subjects in accordance with their study and career aspirations, (with guidance from the course coordinator).</p> <p>This course is of great benefit to students who:</p> <ul style="list-style-type: none"> # Do not wish to specialise in one particular area; # are not yet certain where their interest and career aspirations lie; or # for those with an existing qualification in the disciplines represented in the Melbourne School of Design, (or related) who wish to enhance their qualifications through advanced studies in the area(s) of their choice. # It can also be used to establish academic credentials for entry into a research higher degree. <p>Master of Design students may structure their program by choosing subjects from the study areas listed below, or, the following specialisations:</p> <ul style="list-style-type: none"> # Heritage (for further details click here (../view/current/234AH)) # Urban Design <p>Study areas:</p> <ul style="list-style-type: none"> # Architectural conservation # Architectural Practice and Management # Architectural history # Architectural theory # Architectural practice and management # Construction management # Landscape conservation # Landscape architectural theory # Landscape design # Project management # Property management # Urban design # Urban planning # Statutory planning # Transport planning # Urban sustainability # Workplace planning and design

Objectives:	<p>The course aims to develop skills in the discipline areas offered by the Melbourne School of Design. Applicants may pursue a prescribed course of study to:</p> <ul style="list-style-type: none"> # enhance their existing qualifications; # assist in a shift within the disciplines represented in the Faculty; and/or # lead to further academic studies.
Course Structure & Available Subjects:	<p>All students must complete: 100 credit points graduate level subjects.</p> <p>Students select from graduate level subjects offered by the Melbourne School of Design in consultation with the course coordinator (not all subjects are offered every year and some subjects have prerequisites). Students should contact the Environments and Design Student Centre (see contact details above) to organise subject selectio</p> <p>For a complete listing of subjects offered by the Melbourne School of Design click here. (http://www.msd.unimelb.edu.au/msd-all-subjects.html)</p>
Subject Options:	<p>100 point graduate level subjects</p> <p>This course is tailored to meet the requirements of individual candidates. For assistance with subject selection contact the Environments and Design Student Centre (contact details above).</p>
Entry Requirements:	<p>The Master of Design (by Coursework) is available to:</p> <ul style="list-style-type: none"> # graduates with at least a four-year undergraduate degree in the disciplines of the Faculty, or a closely related area, with a minimum average of H2B (70%); # or to graduates with a three-year undergraduate degree plus a one year Postgraduate Diploma in a relevant discipline, with a minimum average of H2B (70%).
Core Participation Requirements:	<p>The Melbourne School of Design is the graduate school of the Faculty of Architecture, Building and Planning. It offers professional entry programs in Architecture, Construction Management, Landscape Architecture, Property and Urban Planning. It offers specialist development programs in Property Valuation, Planning and Design and in Urban Design. The Melbourne School of Design welcomes applications from students with disabilities. It is the University and Faculty (Architecture, Building and Planning) policy to take reasonable steps to make reasonable adjustments so as to enable students' participation in degrees offered by the Melbourne School of Design (MSD). A candidate for degrees offered in the MSD must have abilities and skills which include the following: observation; communication; motor; conceptual, integrative, and quantitative; and behavioural and social. Adjustments can be provided to minimise the impact of a disability, however, particularly at Masters level, students need to be able to participate in programs in an independent manner and with regard to their safety and the safety of others.</p> <p>(i) Observation: Candidates must be able to read text, diagrams, maps, drawings and numerical data. Candidates should be able to observe details at a number of scales and to record useful observations of environmental contexts.</p> <p>(ii) Communication: Candidates should be able to communicate with fellow students, professional and academic staff, members of relevant professions and the public. Candidates must be able to communicate effectively and sensitively. Communication includes not only speech but also reading and writing.</p> <p>(iii) Motor: Candidates should have sufficient motor function to elicit information from environmental contexts. Off campus investigations may include visits to construction sites, urban, rural and/or remote environments. Candidates should have sufficient motor ability to prepare documentation of analytic texts, drawings and models of findings and for the preparation of proposals for environmental interventions via digital or other means. Candidates should have the ability to actively participate in appropriate site and/or design studio-based activities.</p> <p>(iv) Intellectual-Conceptual, Integrative and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis, synthesis and, importantly, the ability to interpret results of such work. Problem resolution, the critical skill demanded of graduates, requires all of these intellectual abilities. In addition, given the disciplines pursued in the MSD, candidates should be able to comprehend three-dimensional relationships and to understand the spatial relationships in environmental structures of a wide range of scales –from smaller than the individual through individual buildings and urban spaces to large geographic areas. Further, graduate study entails learning to master one's own abilities and skills and to deploy them strategically. This requires further developing skills in both reflective and reflexive thinking</p>

	<p>and being able to practice these skills.(v) Behavioural and Social Attributes: A candidate must possess behavioural and social attributes that enable them to participate in a complex learning environment. Students are required to take responsibility for their own participation and learning. They also contribute to the learning of other students in collaborative learning environments, demonstrating interpersonal skills and an understanding of the needs of other students. Assessment may include the outcomes of tasks completed in collaboration with other students. Students who feel a disability will prevent them from meeting the above academic requirements are encouraged to contact the Disability Liaison Unit.</p>
Graduate Attributes:	Refer to University of Melbourne graduate attributes located at http://www.unimelb.edu.au/about/attributes.html
