

# CHEM30015 Advanced Practical Chemistry

<b>Credit Points:</b>	12.50						
<b>Level:</b>	3 (Undergraduate)						
<b>Dates &amp; Locations:</b>	2011, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus.						
<b>Time Commitment:</b>	Contact Hours: On average 7 hours a week of practical laboratory work. Total 84 hours. Total Time Commitment: Estimated total time commitment of 120 hours						
<b>Prerequisites:</b>	Completion of <table border="1" data-bbox="389 546 1485 696"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>CHEM20019 Practical Chemistry 2</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	CHEM20019 Practical Chemistry 2	Semester 2	12.50
Subject	Study Period Commencement:	Credit Points:					
CHEM20019 Practical Chemistry 2	Semester 2	12.50					
<b>Corequisites:</b>	and <table border="1" data-bbox="389 748 1485 898"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>CHEM30016 Reactivity and Mechanism</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	CHEM30016 Reactivity and Mechanism	Semester 1	12.50
Subject	Study Period Commencement:	Credit Points:					
CHEM30016 Reactivity and Mechanism	Semester 1	12.50					
<b>Recommended Background Knowledge:</b>	None						
<b>Non Allowed Subjects:</b>	Students who have completed two or more of the following subjects may not also gain credit for this subject <ul style="list-style-type: none"> <li># 610-315 Physical Chemistry Practical III (prior to 2009)</li> <li># 610-325 Organic Chemistry Practical III (prior to 2009)</li> <li># 610-345 Inorganic Chemistry Practical III (prior to 2009)</li> </ul>						
<b>Core Participation Requirements:</b>	For the purposes of considering applications for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005) and Students Experiencing Academic Disadvantage Policy, this subject requires all students to actively and safely participate in laboratory activities. Students who feel their disability may impact upon their participation are encouraged to discuss this with the Subject Coordinator and the Disability Liaison Unit. Hhttp://www.services.unimelb.edu.au/disability/						
<b>Coordinator:</b>	Assoc Prof Trevor Smith						
<b>Contact:</b>	Email: <a href="mailto:third-year-lab@chemistry.unimelb.edu.au">third-year-lab@chemistry.unimelb.edu.au</a> (mailto:third-year-lab@chemistry.unimelb.edu.au)						
<b>Subject Overview:</b>	<p>This subject will build on the experience gained in second year practical chemistry through the synthesis and characterisation of complex molecules, the acquisition and interpretation of advanced spectroscopic and physical data and the investigation of chemical systems through computational techniques. It consists of a series of laboratory-based experiments aimed at developing skills in the synthesis, safe handling and analysis of chemical substances of a range of different classes of compounds; an understanding of modern characterisation techniques (e.g. chromatography, atomic and molecular spectroscopy); and the operation of instrumentation for the acquisition of kinetic, structural and thermodynamic data.</p> <p>A component of this subject will also involve the development of skills in independent practical work through the design and implementation of experimental procedures and techniques, and data interpretation. The subject will also provide opportunities for the development of scientific writing and presentation skills, problem solving and small group collaboration, while introducing resources and software commonly used within chemical research fields (i.e. scientific databases, chemical drawing software, molecular modelling &amp; optimisation, etc).</p>						

	<p>In addition to increased proficiency in standard techniques, this subject provides an introduction into research-based chemistry through integrated and themed experiments. It will provide skill development in a range of techniques utilised in the modern chemistry laboratory.</p> <p>The subject provides experience across multiple traditional chemical disciplines whilst highlighting the importance of these disciplines in diverse 'real world' applications such as materials science and medicinal chemistry.</p>
<b>Objectives:</b>	This subject aims to refine students' experimental skills in the synthesis of complex molecules; the application and interpretation of advanced spectroscopic, computational and physical techniques; and the recording, interpretation and reporting of scientific observations.
<b>Assessment:</b>	Assessment of students' technical competence, reporting and interpretative skills will be based on 9 to 12 short reports of up to 6 pages each (meeting the required format) to be completed during the first half of the semester and two to three longer reports of up to 10 pages each (meeting the required format) based on themed experiments to be conducted in the second half of the semester (85%). The remaining 15% of the assessment will be based on students' contributions to group work (conducted in weeks 10 to 12) and will be based on a long report (up to 10 pages), peer review (up to 500 words), a short oral presentation and one viva of up to 15 minutes duration.
<b>Prescribed Texts:</b>	The laboratory manual for this subject.
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
<b>Generic Skills:</b>	<p>Upon completion of this subject, students should have developed the following generic skills:</p> <ul style="list-style-type: none"> <li># the ability to use conceptual models to rationalise observations;</li> <li># data recording and interpretation of scientific observations;</li> <li># ability to search databases and the scientific literature;</li> <li># ability to use advanced computational packages;</li> <li># be able to apply procedures for data and error analysis;</li> <li># ability to write scientific reports;</li> <li># an understanding and basic operations of modern techniques;</li> <li># an awareness of safe and diligent laboratory practice, including safe chemical and glassware handling, and proper instrument operation.</li> </ul>
<b>Notes:</b>	<p>This subject is available for science credit to students enrolled in the BSc (both pre-2008 and new degrees), BASc or a combined BSc course.</p> <p>A laboratory coat and safety glasses are required for laboratory activities (to be provided by the student).</p>
