

CHEN90011 Bioenvironmental Engineering

Credit Points:	12.50																		
Level:	9 (Graduate/Postgraduate)																		
Dates & Locations:	2011, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus. Lectures, tutorials and practical work.																		
Time Commitment:	Contact Hours: An average of 3 hours of lectures per week + 2 x three hour practical work sessions per semester + 1 x field trip per semester Total Time Commitment: Estimated 120 hours																		
Prerequisites:	<p>Students must have taken ONE OF the following subject prior to enrolling in this subject:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>CHEN90008 Biology for Engineers</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>BTCH90006 Bioprocess Engineering</td> <td>Not offered 2011</td> <td>12.50</td> </tr> <tr> <td>CHEN30014 Bioprocess Engineering</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table> <p>As well as the following subject:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>CHEN30001 Reactor Engineering</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table>	Subject	Study Period Commencement:	Credit Points:	CHEN90008 Biology for Engineers	Semester 1	12.50	BTCH90006 Bioprocess Engineering	Not offered 2011	12.50	CHEN30014 Bioprocess Engineering	Semester 1	12.50	Subject	Study Period Commencement:	Credit Points:	CHEN30001 Reactor Engineering	Semester 1	12.50
Subject	Study Period Commencement:	Credit Points:																	
CHEN90008 Biology for Engineers	Semester 1	12.50																	
BTCH90006 Bioprocess Engineering	Not offered 2011	12.50																	
CHEN30014 Bioprocess Engineering	Semester 1	12.50																	
Subject	Study Period Commencement:	Credit Points:																	
CHEN30001 Reactor Engineering	Semester 1	12.50																	
Corequisites:	None																		
Recommended Background Knowledge:	None																		
Non Allowed Subjects:	None																		
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/																		
Contact:	Email: gjmartin@unimelb.edu.au (mailto:gjmartin@unimelb.edu.au)																		
Subject Overview:	The characteristics of liquid and solid wastes and the objectives of waste treatment; important waste assay procedures; primary, secondary and tertiary wastewater treatment processes; physical and chemical treatment processes for both liquid and solid wastes; biological waste treatment and the role of various microbial groups: anaerobic, facultative, aerobic and aerated lagoons and factors affecting their design; activated sludge and related processes; adherent growth processes and associated design considerations; biological and physico-chemical removal of nitrogen and phosphorus; anaerobic processes and their use in liquid and solid waste treatment; treatment and disposal of biosolids; recycling and reuse of wastes; sustainability and cleaner production.																		
Objectives:	<ul style="list-style-type: none"> # Students successfully completing this subject should have a broad understanding of the nature of waste streams, the principles underlying their treatment, and the important processes used to treat a variety of domestic, industrial and agricultural wastes. # In addition they will have gained an understanding of the more important physical, chemical and biological techniques used in the process design of a variety of waste treatment systems. 																		

	# They will also have gained practical experience in the operation of a bench scale activated sludge unit and the common assay procedures used to evaluate its performance.
Assessment:	One 3-hour examination at the end of semester (70%); One mid-term test (20%) One practical report of no more than 2000 words (10%) An overall mark of 50% and a mark of 40% or more in the end of semester examination are needed to pass the subject.
Prescribed Texts:	None
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	The subject will enhance the following generic skills: <ul style="list-style-type: none"> # The capacity for independent thought. # The ability to comprehend complex concepts and communicate lucidly this understanding # Awareness of advanced technologies in the discipline # The ability to work in a team (practical work component)
