Subject Overview:	<p>This subject is for students enrolled in the Master of Dental Science by research who wish to conduct their research project in the field of oral and maxillofacial surgery. It does not include clinical training.</p> <p>The Didactic Component</p> <p>The course consists of a combination of any or all of the following components: tutorials, laboratory work, paraclinical and clinical assignments, written assignments and a research project.</p> <p>Candidates may be required to assist in undergraduate teaching, but this will be limited to one session per week over the teaching semesters.</p> <p>The Clinical Aspect</p> <p>This course is essentially research-orientated, but candidates may be able to carry out some clinical work related to their research activities.</p> <p>The Research Project</p> <p>Candidates will spend the majority of their time undertaking the research project.</p>
Objectives:	In consultation with their supervisors, students will undertake a research project and write a major thesis based on their research findings.
Assessment:	Assessment will be by presentation of a major thesis (of approximately 40,000 words) detailing the results of research activities carried out during the course. (The examiners reserve the right in some circumstances to require the candidate to submit to a written and/or oral examination relating to the subject of the thesis). The thesis must be satisfactorily completed by the candidate and passed by the examiners. It is expected that the thesis will include one or more papers published or in preparation for publication. Pass requirements for each subject are as described above.
Prescribed Texts:	.
Breadth Options:	This subject is not available as a breadth subject.
