<b>Subject Overview:</b>	This course provides students with an understanding of issues involved in the design and conduct of empirical research in finance (including the application of statistical and econometric techniques) by examination of recent seminal published work in selected areas of the finance discipline. In doing so, it aims to help students develop a critical perspective on the development of the academic finance discipline and its contribution to the practice of finance.
<b>Objectives:</b>	<ul style="list-style-type: none"> <li># Discuss how research questions are created and developed into researchable and testable models.</li> <li># Appreciate the range of alternative empirical methods in finance.</li> <li># Develop an ability to critically analyse the research of others in finance.</li> <li># Provide the opportunity to develop a research proposal in finance.</li> </ul>
<b>Assessment:</b>	A 3-hour end-of-semester examination (60%) and written assignments totalling not more than 4000 words (40%).
