Subject	Study Period Commencement:	Credit Points:																												
ISYS90026 Fundamentals of Information Systems	Not offered 2011	12.50																												
COMP90041 Programming and Software Development	Not offered 2011	12.50																												
SINF90001 Database Systems & Information Modelling	Not offered 2011	12.50																												
BISY90001 Business and Information Technology	Semester 1, Semester 2	12.50																												
ISYS90045 Professional IS Consulting	Not offered 2011	12.50																												
ISYS90048 Information Technology Infrastructure	Not offered 2011	12.50																												
ISYS90049 Business Analysis Modeling and Design	Not offered 2011	12.50																												
ISYS90050 IS Project and Change Management	Not offered 2011	12.50																												
Entry Requirements:	An undergraduate degree in any discipline with at least H3 (65%) average in the final year of study or equivalent.																													

Core Participation Requirements:	The Graduate Certificate in Information Systems welcomes applications from students with disabilities. It is University and degree policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the degree. The Graduate Certificate in Information Systems requires all students to enrol in subjects where they will require: (1) the ability to comprehend complex science and technology related information;(2) the ability to clearly and independently communicate a knowledge and application of science, and technology principles and practices during assessment tasks;(3) the ability to actively and safely contribute in clinical, laboratory, and fieldwork/excursion activities. Students must possess behavioural and social attributes that enable them to participate in a complex learning environment. Students are required to take responsibility for their own participation and learning. They also contribute to the learning of other students in collaborative learning environments, demonstrating interpersonal skills and an understanding of the needs of other students. Assessment may include the outcomes of tasks completed in collaboration with other students. There may be additional inherent academic requirements for some subjects, and these requirements are listed within the description of the requirements for each of these subjects. Students who feel their disability will impact on meeting this requirement are encouraged to discuss this matter with the relevant Subject Coordinator and the Disability Liaison Unit: http://www.services.unimelb.edu.au/disability/
Graduate Attributes:	Graduates should have the ability to demonstrate independent critical inquiry, analysis and reflection.
