

GEOG30004 Fluvial Geomorphology

Credit Points:	12.50												
Level:	3 (Undergraduate)												
Dates & Locations:	2011, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus.												
Time Commitment:	Contact Hours: One 2 hour lecture per week; three 2 hour practicals, two 1-day fieldtrips and a 2-day fieldtrip. Total Time Commitment: Not available												
Prerequisites:	<p>Completion of 25 points of second/third year subjects from Geography, Environments, Environmental Engineering or Earth Sciences.</p> <p>OR</p> <p>Completion of ONE of the following subjects:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>GEOG20009 Rivers, Lakes and Wetlands</td> <td>Not offered 2011</td> <td>12.50</td> </tr> <tr> <td>GEOG20002 Understanding Global Landforms</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>GEOG30022 Rivers: Hydrology and Ecology</td> <td>Semester 1</td> <td>12.50</td> </tr> </tbody> </table> <p>OR</p> <p>Permission from the subject coordinator (ie for candidates with professional or other relevant experience).</p>	Subject	Study Period Commencement:	Credit Points:	GEOG20009 Rivers, Lakes and Wetlands	Not offered 2011	12.50	GEOG20002 Understanding Global Landforms	Semester 1	12.50	GEOG30022 Rivers: Hydrology and Ecology	Semester 1	12.50
Subject	Study Period Commencement:	Credit Points:											
GEOG20009 Rivers, Lakes and Wetlands	Not offered 2011	12.50											
GEOG20002 Understanding Global Landforms	Semester 1	12.50											
GEOG30022 Rivers: Hydrology and Ecology	Semester 1	12.50											
Corequisites:	None												
Recommended Background Knowledge:	Completion of <i>GEOG20002 Understanding Global Landforms</i> ; <i>GEOG20009 Rivers, Lakes and Wetlands</i> or <i>GEOG30022 Rivers: Hydrology and Ecology</i> is recommended. Candidates with professional experience will also be considered.												
Non Allowed Subjects:	None												
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/												
Coordinator:	Dr Philip Marren

Subject Overview:	Fluvial Geomorphology is the study of rivers as physical systems, and their role in shaping the surface of the earth. Students who complete the course will not only see the landscape with new eyes, but they will have knowledge and skills essential for anyone interested in the management of rivers for environmental purposes. We will emphasise a strong process-based approach based on sediment transport and deposition, coupled with examination of modern stream channel change in the light of climate and land use changes over the last two million												

	years. The course will provide an understanding of how and why the variety of natural rivers comes about, including the unique streams of Australia.
Objectives:	At the end of the course, students will be expected to have developed an understanding of the processes of river management. Students will have developed the following: <ul style="list-style-type: none"> # An understanding of how river systems develop within catchments; # An understanding of how the form of a river is controlled by processes operating over a catchment; # An understanding of how hydrology and sediment transport combine to control erosion and deposition; and # An understanding of how changes in the supply of water and sediment due to climate change or human intervention leads to channel changes.
Assessment:	A major fieldtrip report of 1500 words (30%, due at end of semester); an essay of 1500 words (30%, due late semester); two minor fieldtrip reports (1000 words each; 20% each, due mid semester)
Prescribed Texts:	Fluvial Forms and Processes: A New Perspective (D Knighton), Arnold 1998
Breadth Options:	This subject potentially can be taken as a breadth subject component for the following courses: <ul style="list-style-type: none"> # Bachelor of Commerce (https://handbook.unimelb.edu.au/view/2011/B-COM) # Bachelor of Music (https://handbook.unimelb.edu.au/view/2011/B-MUS) <p>You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.</p>
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Upon successful completion of this subject, students will have acquired the following skills: <ul style="list-style-type: none"> • spatial analysis (three-dimensional interpretation); • management of complex natural systems; • linking in theoretical terms; and • competence in writing consultancies and journal entries.
Notes:	Students enrolled in the BSc (both pre-2008 degree and new degrees), or a combined BSc course (except for the BA/BSc) may receive science credit on the completion of this subject.
Related Course(s):	Bachelor of Science
Related Majors/Minors/Specialisations:	Environmental Geographies, Politics and Cultures Geography Geography Geography Major Science credit subjects* for pre-2008 BSc, BASc and combined degree science courses
