Coordinator:	Assoc Prof Julie Satur
Contact:	Melbourne Dental School 4th Floor, 720 Swanston Street Telephone: +61 3 9341 1500 Email: enquiries@dent.unimelb.edu.au http://www.dent.unimelb.edu.au/
Subject Overview:	<p>This subject comprises three modules:</p> <p>Health Policy: Policy making, stakeholders, processes and evidence, public health policy and oral health and some current dilemmas in health care.</p> <p>Sociology: Concepts and theories on the arrangement of society and the influences that shape it; how people form values and cultures; class, status, gender and ethnicity; the influences of political, socio-demographic and socio-economic factors on health; the sociology of health and illness and its influences on research methodology.</p> <p>Oral Health Therapy Research: Students to complete one of the following units: Health Promotion or Outreach Elective Studies. Health Promotion comprises project work in the field of oral health promotion. Students are allocated to a group to design, implement and evaluate a health promotion program for a community group. The student group will conduct a needs analysis using the principles of research methodology and evidence based practice to undertake a review of the existing knowledge and context for the program, formulate program objectives, design appropriate interventions to improve oral health status in the selected community group or setting; achieve ethical approval where required, implement and evaluate the intervention; analyse and present the results through an oral presentation and written report. Outreach Elective Studies comprises development and project work in an area of interest to extend students' expertise in one aspect of oral health therapy practice. This unit requires students to apply the principles of research methodology and evidence-based practice to undertake a review of the existing knowledge of the study topic, formulate learning objectives, undertake pre-determined activities to develop their learning and report their learning against their objectives in both written and oral forms. The unit may incorporate outreach work relevant to oral health therapy practice and education such as fieldwork in dental services, special needs</p>

	or residential care settings, public health centres or visits/exchanges to other oral health therapy educational programs interstate or overseas.
Objectives:	<p>On completion of this subject the student should:</p> <p>Comprehend:</p> <ul style="list-style-type: none"> # The characteristics of public health programs and their evaluation; and # The resources available to oral health professionals in the promotion of oral health. <p>Demonstrate:</p> <ul style="list-style-type: none"> # The capacity to communicate with people to identify and address their health needs; # The capacity to review and apply research skills and evidence based practice to oral health therapy practice; # An appreciation of sociological inquiry; and # An understanding of public policy issues as they affect Oral Health practice. <p>Have developed skills in:</p> <ul style="list-style-type: none"> # Information seeking, evaluation and retrieval; # Intercultural sensitivity and understanding; # Planning and organisation # Oral and written communication # Applying ethical principles to the practice of oral health therapy; and <p>Have developed an openness to new ideas; and</p> <p>Have developed extended knowledge in a specialist area of oral health therapy practice.</p> <p>Appreciate:</p> <ul style="list-style-type: none"> # The collaborative role of agencies and health care providers in the community in the promotion of oral health; # The role of evidence based practice in the promotion of oral health; and # The capacity of health promotion to contribute to the improvement of oral health outcomes in the community.
Assessment:	Two written assignments of no more than 1000 words each to be submitted mid-April (20%); One written report of no more than 3000 words (per student) covering the theoretical and practical aspects of the outreach placement or research project undertaken, to be submitted at the end of Semester 2 (60%); and An oral presentation (of 15 minutes' duration) outlining the learning and value of the work undertaken to be presented at the end of Semester 2 (20%). An overall assessment mark of 50% is required to pass this subject.
