Subject Overview:	Developing and newly-industrialised countries experience wide variation in terms of history, politics, demographic transition, development and epidemiology. This subject situates women and their health in a dynamic context of development, globalization and change. It examines key health issues, primarily for women in the Region, but also in other international contexts, and explores factors which impact on health and illness through the lifespan. Gender and rights provide frameworks for analysis.
Objectives:	On completion of this subject, students should be able to: <ul style="list-style-type: none"> # Describe the context of women and their health in an international context # Discuss key health issues for women in an international context # Develop a gender framework for a country-specific intervention
Assessment:	One in-class presentation of 20 mins (20%) held on the last teaching day; written paper of 1000 words (20%), due on the last teaching day; and one 3,000 word essay (60%) due at the end of semester.
Prescribed Texts:	Selected readings will be available.
Breadth Options:	This subject is not available as a breadth subject.
