Coordinator:	Assoc Prof Carol Hulbert								
Contact:	Sarah Drew sarah@unimelb.edu.au								
Subject Overview:	This subject provides an opportunity for didactic and experiential learning in cognitive-behavioural treatment models and techniques. Although the prime focus will be on cognitive-behavioural treatments for adult psychological disorders, attention will be paid to other treatment modalities (eg. pharmacological, psychosocial, etc.) where appropriate. Teaching may be composed of a combination of didactic input, class discussions, practical experience and observations.								
Objectives:	<p>On completion of this subject, students should:</p> <ol style="list-style-type: none"> 1 Understand the basic theoretical concepts and processes which underpin cognitive-behavioural therapeutic practice; 2 Understand basic assessment, therapeutic approaches and techniques for working with clients presenting with psychological disorders, including depression, anxiety disorders, psychotic and personality disorders, intellectual disability and common relationship issues across the lifespan. 3 Possess the knowledge base necessary to undertake on placement, under supervision, basic assessment and CBT; 4 Possess skills in case formulation; and 5 Possess a basis for understanding basic theoretical concepts, processes and techniques through the critical analysis of case material. 								
Assessment:	Mid-semester written clinical case formulation of 1250 words (50%)An end-of-semester written treatment plan of 1250 words (50%)A hurdle requirement of attendance at two 6-hour clinical training workshops on working as a CBT practitioner.								

Prescribed Texts:	Wills, A (1997) Cognitive Therapy of Anxiety Disorders: Practical Manual and Conceptual Guide Wiley
