VETS20005 Veterinary Bacteriology & Mycology

Credit Points:	12.50
Level:	2 (Undergraduate)
Dates & Locations:	2011, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus.
Time Commitment:	Contact Hours: 28 hours of lectures, 12 hours of practical classes and 57 hours of computer assisted learning. Total Time Commitment: Estimated total time commitment 120 hours (minimum).
Prerequisites:	Nil
Corequisites:	Nil
Recommended Background Knowledge:	Nil
Non Allowed Subjects:	Nil
Core Participation Requirements:	Prospective students are advised to familiarise themselves with the Faculty's Academic Requirements Statement http://www.vet.unimelb.edu.au/docs/CoreParticipationReqs.pdf
Coordinator:	Dr Marc Marenda
Contact:	Ph 9731 2033 Email: mmarenda@unimelb.edu.au (mailto:mmarenda@unimelb.edu.au)
Subject Overview:	Topics include: systematic bacteriology and mycology and practical exercises in veterinary microbiology.
Objectives:	At the end of the sequence Veterinary Microbiology & Virology and Veterinary Bacteriology & Mycology, students completing these subjects should:
	# possess the essential information on the important characteristics of bacteria, fungi and viruses and the way they exert their pathogenic effects and produce clinical signs of disease; # understand the distribution of microbes in nature and the manner by which those of veterinary importance are spread; # be familiar with the methods of disinfection and sterilisation and their use in practice;
	# understand the principles of anti-microbial therapy;
	# understand the need for rational judgments in the use of antimicrobial therapy;
	$_{\#}$ understand the immune response infection and possible abnormalities of the responses;
	 # understand the principles and use of vaccines in the control of infectious diseases; be familiar with the methods of diagnosis of infectious diseases; # understand the principles of non-therapeutic control measures;
	# understand approaches to the diagnosis of infectious disease (including the isolation and identification of pathogens and their detection using immunoassays).
Assessment:	A literature search and review (15%), one short written assignment (1000 words maximum) (20%) as indicated in the teaching timetable available at the commencement of the semester, a practical class assignment (10%) and a computer-based open-book examination of two hours' duration at the end of the semester (55%).
