

VETS30025 Veterinary Clinical Sciences

Credit Points:	6.25								
Level:	3 (Undergraduate)								
Dates & Locations:	2011, Parkville This subject commences in the following study period/s: Year Long, Parkville - Taught on campus.								
Time Commitment:	Contact Hours: Lectures: 42 hours. Practicals: 9 hours. Total Time Commitment: 90 hours								
Prerequisites:	Successful completion of all subjects in Year 2 of Bachelor of Veterinary Science course.								
Corequisites:	Students must enrol in the following subject:								
	<table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>VETS30024 Veterinary Paraclinical Sciences</td> <td>Year Long</td> <td>12.50</td> </tr> </tbody> </table>			Subject	Study Period Commencement:	Credit Points:	VETS30024 Veterinary Paraclinical Sciences	Year Long	12.50
Subject	Study Period Commencement:	Credit Points:							
VETS30024 Veterinary Paraclinical Sciences	Year Long	12.50							
Recommended Background Knowledge:	Years 1 and 2 (Semesters 1-4) of the BVSc course								
Non Allowed Subjects:	None								
Core Participation Requirements:	Prospective students are advised to familiarise themselves with the Faculty's Academic Requirements Statement.								
Coordinator:	Assoc Prof Andrew Vizard								
Contact:	Email: a.vizard@unimelb.edu.au (mailto:a.vizard@unimelb.edu.au)								
Subject Overview:	<p>This subject covers:</p> <ul style="list-style-type: none"> # Veterinary epidemiology. # Economics and decision making. # Introduction to diagnostic methods. # Statistics and systems analysis. # Animal breeding and genetic improvement. # Permanent identification of dogs, cats and horses (microchips). # Principles of: <ul style="list-style-type: none"> - Endoscopy; - Surgery in diagnosis; - Wound closure techniques; - Radiography; and - Ultrasonography. 								
Objectives:	<p>Students completing this subject should:</p> <ul style="list-style-type: none"> # understand the concepts of epidemiology; # be aware of factors which influence patterns of disease; # be familiar with the techniques of data acquisition and analysis and the uses and limitations of statistical information; # be able to undertake epidemiological investigations of animal disease outbreaks; # be able to provide economic reasoning in decision making when dealing with animal production systems; # be able to design a simple breeding program for animals; # understand the principles of selection for genetic improvement in various animal production systems; # be able to advise on the use of reproductive technologies to improve the rate of genetic gain; # further develop computer skills and skills in integrating material from previous subjects; 								

	<ul style="list-style-type: none"> # understand the principles and practical approach to microchipping dogs, cats and horses; # understand the principles and applications of endoscopy, surgery as a diagnostic tool, radiography and ultrasonography; and # consolidate their knowledge of veterinary public health, especially as it relates to food production systems and to zoonotic diseases and emerging diseases.
Assessment:	One 1-hour written paper at the end of Semester 1 (45%) One 1-hour written paper after Semester 2 intra-semester break (45%) Assessment of practical exercises (10%) during semesters Students are required to pass the subject on aggregate marks
Prescribed Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
