Course Overview:	<p>This course is aimed at health practitioners, particularly general practitioners or nurses training in sexual health, (or related fields) who may be in urban, regional or rural Australia. It is also suitable for public health practitioners and students who may have an interest in sexual health. The core subjects taught are available in face-to-face or distance mode and draw on national and international developments in the diagnosis and public health control of sexually transmissible infections.</p> <p>Graduates from this course will find it easier to enter careers related to sexual health in the fields of clinical care, research, the pharmaceutical industry, or hospitals.</p>										
Objectives:	<p>On completion of the Postgraduate Certificate in Public Health (Sexual Health) graduates will:</p> <ul style="list-style-type: none"> # have developed an understanding of the epidemiology, diagnosis and management of sexually transmissible infections # have gained an understanding of the sexual and reproductive health issues relevant to Australia # have developed an understanding of the public health control of sexually transmissible infections # have gained the ability to evaluate and synthesise the relevant literature # be able to apply the conceptual and practical dimensions of the course in their own professional practice 										
Course Structure & Available Subjects:	Four subjects taken over one or two years part-time (one or two subjects per semester)										
Subject Options:	<p>Core Subjects</p> <p>Students must complete at least 2 of the following 3 core subjects:</p> <p>Please note that POPH90068 Sexually Transmissible Infections now incorporates the learning objectives of Control of Sexual Transmissible Infections (previous subject). Existing students who have already completed either Control of STIs or Sexually Transmissible Infections should enroll in Adolescent Sexuality and Sexual Health as their core requirement.
