

980AA Bachelor of Medicine & Bachelor of Surgery & Bachelor of Medical Science

Year and Campus:	2012 - Parkville
CRICOS Code:	017541J
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Level:	Undergraduate
Duration & Credit Points:	600 credit points taken over 72 months full time. This course is available as full or part time.
Coordinator:	Professor Geoff McColl
Contact:	<p>Medicine, Dentistry and Health Sciences Student Centre Level 1, Brownless Biomedical Library The University of Melbourne Victoria 3010 Australia Phone: +61 3 8344 5890 Fax: +61 3 9347 7084 Email: sc-mdhs@unimelb.edu.au</p> <p>http://studentcentre.mdhs.unimelb.edu.au/ (http://studentcentre.mdhs.unimelb.edu.au/)</p>
Course Overview:	<p>The Undergraduate Entry Program takes six years and all students graduate with a Bachelor of Medicine and Bachelor of Surgery degree (MBBS) and a Bachelor of Medical Science degree (BMedSc). The MBBS program is conducted over Semesters 1-5 and 8-12, and the BMedSc program over Semesters 6-7. Students who do not wish to continue in the medical program can graduate with a BMedSc degree after successful completion of Semesters 1-7.</p> <p>The structure and philosophy of the course is based on the following themes which aim to give students a balance of medical knowledge, a view of the social aspects of medicine, and the skills and attitudes necessary for the practice of medicine well into the 21st century:</p> <ul style="list-style-type: none"> # the scientific basis of medicine; # population health; # clinical skills; # professional attitudes and development. <p>The course features a number of teaching methods including problem-based learning; an emphasis on self-directed learning strategies; computer-assisted learning packages to enhance learning; the early introduction of clinical skills teaching and early exposure of students to health practice settings and to patients; and appropriate time for independent study. A large component of the teaching and learning in Semesters 8-12 occurs through direct patient contact and clerking and small group bedside teaching.</p> <p>Body systems subjects in Semesters 1-5 integrate teaching of the basic sciences relevant to medicine such as anatomy, physiology, biochemistry, molecular biology, physics, pharmacology, pathology and microbiology. A clinical case presented as a 'problem of the week' enables students to assimilate basic medical science knowledge in the context of patient care.</p> <p>Health practice subjects in Semesters 1-5 cover the areas of the human mind and behaviour, health and society and introduction to clinical medicine. Students visit teaching hospitals and other community health settings to explore aspects of illness and health care arising from the clinical 'problem of the week'.</p> <p>In Semesters 6-7 students explore in depth an area related to medicine from a wide range of topics in advanced medical science subjects. Students are introduced to the formal processes of research and develop skills in literature appraisal, data collection, analysis and presentation. This year may be spent doing research on campus, or subject to approval, at rural, interstate or overseas locations.</p> <p>Clinical rotations in Semesters 8-12 prepare students to enter supervised clinical practice as an intern, while based at one of the general clinical schools associated with the University of Melbourne: Austin and Northern Health, the Royal Melbourne Hospital/Western Hospital, the</p>

	St. Vincent's Hospital, and the Rural Clinical School (Shepparton). Learning and teaching also takes place in institutions associated with the general clinical schools or in more specialised clinical centres such as the Royal Women's Hospital, the Mercy Hospital for Women, the Royal Children's Hospital, and psychiatric hospitals.
Objectives:	<p>The objectives of the Bachelor of Medicine and Bachelor of Surgery and Bachelor of Medical Science are to:</p> <ul style="list-style-type: none"> # produce knowledgeable, caring and competent graduates, well prepared to practise under supervision as interns and subsequently to commence postgraduate vocational training in any area of medicine; and # impart knowledge, attitudes and skills that will encourage and enable graduates to practise ethical and scientifically-based health care with a high level of skill and social responsibility and continue to develop their knowledge and skills throughout their career.
Course Structure & Available Subjects:	<p>Course structure:</p> <p>Semester 1: MEDS10001 Principles of Biomedical Science and MEDS10002 Health Practice 1</p> <p>Semester 2: MEDS10003 Nutrition Digestion and Metabolism and MEDS10004 Health Practice 2</p> <p>Semester 3: MEDS20001 Cardio-respiratory and Locomotor Systems and MEDS20002 Health Practice 3</p> <p>Semester 4: MEDS20003 Control Systems, Growth and Development and MEDS20004 Health Practice 4</p> <p>Semester 5: MEDS30001 Defence Mechanisms and Their Failure and MEDS30002 Health Practice 5</p> <p>Semesters 6 and 7: MEDS30003 Advanced Medical Science 1 and MEDS40001 Advanced Medical Science 2</p> <p>Semesters 8 and 9: MEDS40003 Integrated Clinical Studies</p> <p>Semesters 10 and 11: MEDS50001 Women's and Children's Health and MEDS50002 Specialty Health Rotations</p> <p>Semester 12: MEDS60002 Integrated Clinical Practice</p>
Majors/Minors/ Specialisations	N/A
Subject Options:	N/A
Entry Requirements:	There is no further entry into this course.
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
