Subject Overview:	This subject is designed for those with a general interest in managerial issues rather than a technical accounting focus. The subject focuses on the roles of managerial accounting information in the design of management control systems. More specifically, the subject explores the nature of control systems; the relative role of accounting <i>vis a vis</i> other management controls; and the interaction between accounting and other controls, budgets and accounting performance measures as critical influences on managerial decision making and behaviour; and the implications of contextual influences on control system design, such as strategy and organisational environment. Case studies are used throughout the subject as a means of studying accounting in its organisational context.						
Objectives:	Information not available.						
Assessment:	A 2-hour end-of-semester examination (50%), assignments totalling not more than 3000 words due at regular intervals during semester (40%) and seminar preparation and participation (10%).						
Prescribed Texts:	You will be advised of prescribed texts by your lecturer.
