<b>Subject Overview:</b>	<p>The subject allows students to conduct an original research project, under supervision to be approved by a subject Coordinator. The work will be equivalent to lecture and practical based subjects worth 50 points. The content and extent of the project will be determined by a Coordinator, in collaboration with the student and the supervisor.</p> <p>The work would ordinarily include a review of a body of scientific literature, together with a critical evaluation of research or experimental protocols, and the development of research methods, implementation of a mathematical model, completion of an original experiment, or a thorough exploration of a scientific issue. Projects would ordinarily include a component of original research well beyond a review or critique. Projects would involve regular 1-hour discussion groups where students report on progress, major problems and plans. For substantive reasons, this research project requires more than one semester to complete.</p>
<b>Objectives:</b>	To undertake a directed research project.
<b>Assessment:</b>	Project Proposal (10%) Due week 5 1,500 words, Oral Presentation (15%) Due week 12 15 minutes and Final Report (75%) Due during exam period 10,000 words.
