Subject Overview:	This subject deals with plant function in relation to the changing physical environment and is designed for students of plant science, ecology, forestry and environmental science. Topics to be covered will include: <ul style="list-style-type: none"> # coping with environmental extremes and stress; # water use and drought tolerance; # plant defence and plant-animal interactions; # nutrient cycling and plant-soil interactions; # terrestrial vegetation and soils in the global carbon cycle. 															
Objectives:	Upon completion of this subject, students should have a knowledge of: <ul style="list-style-type: none"> # plant function and performance in relation to the environment; # plant responses to various biotic and abiotic factors; and 															

	# the role of plants in global nutrient and carbon cycling.
Assessment:	Laboratory test during the semester (10%); practical reports totalling up to 2000 words due during the semester (30%); a 2-hour written examination in the examination period (60%).
Prescribed Texts:	None
Breadth Options:	<p>This subject potentially can be taken as a breadth subject component for the following courses:</p> <ul style="list-style-type: none"> # Bachelor of Arts (https://handbook.unimelb.edu.au/view/2012/B-ARTS) # Bachelor of Commerce (https://handbook.unimelb.edu.au/view/2012/B-COM) # Bachelor of Environments (https://handbook.unimelb.edu.au/view/2012/B-ENVS) # Bachelor of Music (https://handbook.unimelb.edu.au/view/2012/B-MUS) <p>You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.</p>
