Further details on the disability support scheme can be found at the Disability Liaison Unit website: <a href="http://www.services.unimelb.edu.au/disability/">http://www.services.unimelb.edu.au/disability/</a>
<b>Coordinator:</b>	Dr Siew-May Loo
<b>Contact:</b>	Melbourne Dental School 4th Floor, 720 Swanston Street Telephone: +61 3 9341 1500 Email: <a href="mailto:enquiries@dent.unimelb.edu.au">enquiries@dent.unimelb.edu.au</a> <a href="http://www.dent.unimelb.edu.au/">http://www.dent.unimelb.edu.au/</a>
<b>Subject Overview:</b>	This subject comprises Orthodontics and Paediatric Dentistry.  <b>Orthodontics</b> expands on the principles introduced in Growth and Development in Dental Practice 2 and Dental Practice 3. It emphasises recognition of normal and aberrant growth, skeletal and occlusal patterns and covers diagnosis of malocclusion, treatment planning and the biomechanics of tooth movement. Clinical activities are aimed primarily at interceptive treatment; however limited fixed appliance therapy is introduced.  <b>Paediatric Dentistry</b> builds upon the principles of growth and development already covered in Dental Practice 2 and Dental Practice 3 and addresses the effects of physical and psychological growth and development on dental health and treatment of the child and the principles of diagnosis and treatment planning for the child. Preclinical experience and practice is gained in preventive and restorative procedures in primary and young permanent dentitions and the management of trauma is addressed.
<b>Objectives:</b>	On completion of this subject, students should: <b>Be able to appreciate:</b>  a) the concepts of total patient care and the dentist's responsibility for the safe and effective management of young persons in the dental situation;

	<p>b) the concept and practice of ongoing total patient care in the prevention, identification, assessment and treatment of oral diseases - as opposed to the episodic management of symptomatic oral problems;</p> <p>c) the necessity for accurate examination, diagnosis, treatment planning and accurate record-taking before commencing the care of child and adolescent patients whether or not they have advanced or complicated problems;</p> <p>d) the value of ensuring the maintenance of oral health after treatment of child and adolescent patients including those with advanced or complicated problems;</p> <p>e) the need for referral in those situations which cannot be successfully managed in general dental practice or require specialist advice or intervention;</p> <p>f) the importance of a preventive and minimal intervention approach to the treatment of routine dental disorders; and</p> <p>g) the behavioural and management aspects of child and adolescent patients.</p> <p><b>Have Developed:</b></p> <p>a) the skills and knowledge to act with safety and care within the dental surgery;</p> <p>b) through student-directed learning, a capacity for independent learning and for critical thinking and reasoning;</p> <p>c) skills in assessing human growth and development;</p> <p>d) skills in history-taking, clinical oral examination and patient management; and</p> <p>e) skills in intra-oral radiography and local analgesia administration.</p>
<b>Assessment:</b>	Continuing assessment throughout the year of pre-clinical and clinical work in Paediatric Dentistry and Orthodontics. (50%)An integrated multiple station Objective Structured Clinical Examination (OSCE) of no more than 25 minutes at the end of Semester 1 to be held in conjunction with an OSCE in each of Oral Rehabilitation, Oral Medicine and Surgery and Oral Health Practice. (15%)A 3-hour written examination in Paediatric Dentistry and Orthodontics at the end of Semester 2 . (35%)
