Subject Overview:	The subject will cover development economics. The topics covered may include: economic growth theory, including models in which growth is endogenous; measurement of poverty and inequality; tests of the efficiency of labour and credit markets; consumption smoothing; micro-credit schemes; and demographic issues. This subject studies microeconomic conditions in developing countries. It aims to go beyond a mere description of economic conditions in these parts of the world. The emphasis is on rigorous theoretical economic modelling of phenomena observed in developing countries. Substantial attention will also be paid to the testing of the theories using real world data. Students are thus expected to have some econometric knowledge.																				

Objectives:	On successful completion of this subject, students should be able to: # Evaluate the ways in which developing countries differ from developed countries; # Identify how these differences affect the economic environment in which people live and the economic decisions made by households; # Analyse the relevance of particular theories to different environments; # Evaluate the results of empirical tests of the economic theories; # Synthesise the theoretical and empirical literature and describe the current state of knowledge in the field of development economics; # Critically evaluate policy prescriptions in developmental economics.
Assessment:	One 3-hour end-of-semester examination (70%) Class assignments not exceeding 6000 words (30%)
Prescribed Texts:	You will be advised of prescribed texts by your lecturer.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	On successful completion of this subject, students should have improved the following generic skills: # Evaluation of ideas, views and evidence # Synthesis of ideas, views and evidence # Strategic thinking # Critical thinking # Application of theory to economic policy and business decision making # Summary and interpretation of information # Statistical reasoning; # Problem solving skills; # Written communication; # Oral communication.
Notes:	Students may not gain credit for both ECON90023 Development Economics and ECON40012 Development Economics.
