Subject Overview:	This course provides an introduction to the theory and practice of mixed methods research and evaluation. Topics that will be covered include: the emergence of mixed methods approaches; nature and purposes of mixed methods studies; choosing mixed methods designs; synthesis of mixed methods data; strengths and limitations of mixed methods research and evaluation projects. Practical aspects of the course will involve the design of a mixed methods study incorporating qualitative and quantitative data sources.
Objectives:	<p>On completion of this subject it is expected that students should be able to:</p> <ul style="list-style-type: none"> • understand the philosophical foundations of mixed methods research and evaluation; • articulate the main features and design options for mixed methods studies; • appropriately combine and integrate a range of data sources within mixed methods studies; and • reflect critically on the benefits and challenges of undertaking interdisciplinary mixed methods studies.
Assessment:	There are three pieces of assessment: 1. Written task of 1500 words due in Week 4 (30%); 2. Written task of 3000 words due at the end of the course (60%); 3. Class or forum participation throughout the semester (10%).
Prescribed Texts:	Creswell, J. & Plano Clark, V. (2010) Designing and conducting mixed methods research (2nd Ed). Thousand Oaks, CA.: Sage.
Breadth Options:	This subject is not available as a breadth subject.
