

ELEN90034 Optical Networking and Design

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2012, Parkville This subject commences in the following study period/s: Semester 2, Parkville - Taught on campus.
Time Commitment:	Contact Hours: 1X 3 hour lecture per week; Total Time Commitment: Estimated total time commitment of 120 hours.
Prerequisites:	4-year Electrical Engineering degree or equivalent
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Coordinator:	Dr An Tran
Contact:	Email: William Shieh sheihw@unimelb.edu.au (mailto:sheihw@unimelb.edu.au)
Subject Overview:	This subject covers the basic areas of optical networks. In particular, it includes the following topics: <ul style="list-style-type: none"> # Optical network elements; # Optical transport network architecture and design; # Optical circuit switching, optical burst switching, and optical packet switching; # Optical network control and management; # Optical network survivability; # Traffic grooming in optical networks; # IP over WDM networks. # Optical access network architectures and technologies (e..Active Ethernet, EPON, GPON, WDM PON); # Design and analysis of optical access networks. # Free space optical networks;
Objectives:	On completion of this subject, the students will develop skills and knowledge required to understand the fundamentals of optical networks and to be able to solve technical problems in the following areas: <ul style="list-style-type: none"> # Fundamental optical network elements; # Optical network architectures ranging from optical access networks to backbone optical transport networks; # Approaches and methodologies of optical network design optimisation; # Techniques of optical network survivability; # Problem solving skills and critical thinking in the discipline of optical networks. # The subject will also help students develop an enthusiasm towards research and development in the field of optical networks

Assessment:	<ul style="list-style-type: none"> • Formally supervised written examination - 3 hours 50% (end of semester). This final exam is a hurdle. A student must pass the exam to pass the subject. • Written class test - 1 hour 20% (mid semester); • A project or homework assignments (1500 – 3000 word limit) 30% (end of semester).
Prescribed Texts:	"Video Processing and Communications", by Yao Wang, Jorn Ostermann, Ya-Qin Zhang, Publisher: Prentice Hall. (Suggested, not mandatory.)
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>On completion of this subject , the students should have developed:</p> <ul style="list-style-type: none"> # Problem solving and analytical skills; # Critical and creative thinking, with and aptitude for continued sel-directed learning; # Sense of intellectual curiosity; # Ability to interpret data and research results; # Ability to learn in a range of ways, including through information and communication technologies; # Capacity to confront unfamiliar problems; # Ability to evaluate and synthesise the research and professional literature; # Ability to develop models of practical applications and evaluate their performance by rigorous analytical means.
Related Course(s):	Master of Telecommunications Engineering Postgraduate Certificate in Engineering
