<b>Subject Overview:</b>	The marketing of service presents unique challenges and opportunities to enhance value creation by customers. This is because of the intangible, heterogeneous nature of the offering and the critical role of service personnel in service delivery. Strategies to address these challenges and opportunities are presented. Topics include: buyer behaviour of services; managing effective servicescapes; the importance and measurement of service quality, customer satisfaction, perceived value and loyalty; relationship marketing philosophy and practice; managing supply and demand of perishable service; the role of service personnel and customers in value creation; minimising the role stress of service personnel; service failures, customer complaint behaviour and effective service recovery.
<b>Objectives:</b>	On successful completion of this subject, students should be able to: <ul style="list-style-type: none"> <li>• Describe the unique challenges involved in the marketing management of service firms;</li> <li>• Identify and analyse the various components of the 'service marketing mix' (people, process and physical evidence), as well as key issues required in measuring and managing service quality, customer satisfaction, loyalty and value perceptions;</li> <li>• Analyse the role of employees and, increasingly, customers in service delivery, customer satisfaction, service recovery and value creation;</li> <li>• Explain other key issues in service businesses such as managing supply and demand, the overlap in marketing/operations/human resource systems and the philosophy and implementation of relationship management.</li> </ul>
<b>Assessment:</b>	A 2-hour end-of-semester examination (50%), a 50 minute mid-semester test (10%), and one team based project consisting of an oral presentation (20%) and written report totalling not more than 4000 words (20%) due in an allocated week throughout semester.
