Contact:	School of Melbourne Custom Programs Level 3, 442 Auburn Road Hawthorn VIC 3122 Phone - 03 9810 3245 Email - transfusion.practice@commercial.unimelb.edu.au (mailto:transfusion.practice@mccp.unimelb.edu.au)
Subject Overview:	This subject is an introduction to the fundamentals of transfusion practice. It begins with an overview of the history that has shaped transfusion medicine into current practices. The subject also reviews basic blood haematology, pathophysiology of diseases that affect blood and blood components, investigation and treatment, and the process of transfusion from vein to vein. Students will be encouraged to arrange visits to various departments/laboratories within their organisation to assist with relating transfusion theory to practice.
Objectives:	At the completion of this subject, student should <ul style="list-style-type: none"> # Develop an understanding of the history that has shaped transfusion medicine into current practices # Develop a strong comprehension of basic blood haematology, pathophysiology of diseases, investigation and treatment that affect blood and blood components # To create an awareness of the process of transfusion from donation to administration
Assessment:	90% of assessment: one open book exam, consisting of 30 multiple choice and 16 short answers. Students have 2 weeks to complete the examination at the end of the semester.10% of assessment: Participation in remote learning forums. Student must contribute to questions posted on the forum and participate in discussion threads on a weekly basis.
