Subject Overview:	This subject provides a general introduction to philosophy through an examination of four big questions: (1) Knowledge and scepticism. What is knowledge and do we actually know what we take ourselves to know? Can we rule out the hypothesis that we occupy some kind of Matrix world in which all our apparent perceptions are the result of brain manipulation? And if we cannot, can we know anything at all? (2) Personal identity. What kind of a thing is a person? What makes you the same person now as you were when you were a baby despite all the enormous physical and psychological changes that have happened to you? What sorts of changes can you undergo and still survive? (3) Morality. Does the rightness of an action depend solely on its consequences? Or are there some actions, like torture, which are morally wrong no matter how desirable the consequences? (4) Personal responsibility in a non-ideal world. What is the responsibility of members of developed countries for global poverty? Is it morally permissible to spend money on non-essentials while children die of preventable poverty-related causes?
