<b>Subject Overview:</b>	This subject will give students an understanding of the principles underlying social research. The topics covered will be relevant for students interested in social research specifically, and for health research students who want to learn about qualitative and quantitative research as it applies to social health research. The first part of this subject will concentrate on the conceptual approaches to research design and process. These sessions will provide both theoretical background and practical advice for doing social research. The second part will discuss ethics in research. Areas to be covered will include the rationale for formal ethical review of research involving humans and details of the ethics committee process, as well as more general discussion of basic ethical principles in research. The subject will draw on different disciplines to highlight different disciplinary approaches to designing and formulating social research projects.
<b>Objectives:</b>	After the completion of this subject students will: <ul style="list-style-type: none"> <li># understand the principles and processes of social research design</li> <li># be able to formulate social research questions</li> <li># have a capacity to design social research at a postgraduate level</li> <li># understand the role of critical literature review in social research design</li> </ul>

	<ul style="list-style-type: none"> <li># have developed an understanding of the different kinds of ethical issues involved in doing research with human participants</li> <li># be familiar with the formal process of ethical review of research</li> <li># be able to complete a human research ethics application form</li> <li># have developed a respect and understanding for the ethics of scholarship</li> </ul>
<b>Assessment:</b>	Completion of a Human Research Ethics application form or other structured written assignment related to human research ethics up to a maximum of 2,500 words (50%) due mid semester Essay up to a maximum of 2,500 words (50%) due at the end of the semester.
<b>Prescribed Texts:</b>	Liamputtong, P. & Ezzy, D. (2005) (2nd ed) Qualitative research methods Melbourne: Oxford University Press.
<b>Recommended Texts:</b>	None
<b>Breadth Options:</b>	This subject is not available as a breadth subject.
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
<b>Generic Skills:</b>	On completion of the subject students will have developed: <ul style="list-style-type: none"> <li># skills in collection, evaluation and interpretation of data</li> <li># skills with which to operationalise a research question</li> <li># effective written and oral communication skills</li> </ul>
