Subject Overview:	This subject will provide an overview of the Australian and international empirical evidence (quantitative and qualitative) on the ways in which social, economic and cultural processes contribute to population health. Students will be introduced to conceptual frameworks for understanding the social determinants of health. The subject will examine relationships between health and gender, poverty, socio-economic position, housing, employment and working conditions, race/ethnicity, discrimination and place.
Objectives:	At the completion of this subject, students should be able to demonstrate the ability to: <ul style="list-style-type: none"> # Assess the key social and economic determinants of health # Analyse the ways in which the multiple social and economic determinants intersect to shape health # Describe models of the social determinants of health # Interpret the empirical evidence on the key social, economic and cultural processes that influence health # Critically analyse the relationship between health and gender, poverty, socio-economic position, employment and working conditions, race/ethnicity, discrimination and place

Assessment:	During semester students will work in groups to prepare on a one hour presentation (on a topic related to the final assignment) which will be given at the end of semester (20%). One essay due mid-semester, 1000 words (20%). One essay due in the assessment period, 3000 words (60%)
Prescribed Texts:	Selected readings will be available.
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Upon completion of this subject a student should be able to: <ul style="list-style-type: none"> # Critically analyse relevant empirical studies and conceptual literature. # Demonstrate advanced written and oral communication skills # Demonstrate advanced skills in critical reading.
