Subject Overview:	This subject aims to provide students with an overview of the principal concepts and theories in medical anthropology. It will provide critical insights on the interface of health, society, and culture and the nature of medical systems in indigenous, developing, and developed societies. This subject examines a range of classic and current theoretical debates within the discipline of anthropology: on rationality and cultural difference; objectivity and reflexivity; biotechnologies; governmentalities and biological citizenship; global health and medicine; modes of anthropological representation and the politics of applied anthropological research.
Objectives:	On completion of this course students will: <ul style="list-style-type: none"> # understand the key concepts and theories used in medical anthropology # have a critical understanding of recent developments in theories of medical anthropology # understand how conceptions of health and illness and the forms and meaning that illness take are reflections of a particular social and cultural context # have developed the capacity to formulate comparative explanations of illness causation, drawing on a variety of explanatory models of cultural, social and behavioural determinants of health. # be able to contextualise socio-cultural studies and present them in terms of policy and practice within the field of medical anthropology
Assessment:	One in-class presentation of 20 minutes (equivalent of 1000 words) (20%) Critical analysis of 1000 words (20%), due mid-semester One 3,000 research essay (60%) due at the end of the semester.

Prescribed Texts:	Good, B. et al. (2010). A Reader in Medical Anthropology: Theoretical trajectories, Emergent Realities. Wiley: London.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Upon completion of this subject a student should have: <ul style="list-style-type: none"> # Advanced written and oral communication skills # Advanced skills in reading critically within and across the discipline of medical anthropology # Advanced skills in critical analysis of relevant theories in medical anthropology.
