Subject Overview:	This unite is a continuation of Adult Psychiatry I. The initial 2 sessions will be a continuation of the curriculum for Adult Psychiatry I and include the topics of depressive disorders, mid-life and late middle-age. The remaining ten sessions will focus on psychiatry of old age and will attempt to influence the attitudes of the students with regard to ageing in a positive manner and in particular to approach the aged in clinical practice with compassion, patience and an awareness of their needs. The old age component of the unit will address the interaction of ageing and mental health, epidemiological and demographical aspects of ageing in Australia and worldwide, the social construction of ageing, individual experiences of ageing, ageing and mental health of indigenous Australians, physical and psychological consequences of ageing, families and ageing, sexuality and ageing, death and dying, common cognitive and functional disorders in the elderly, physical health, pharmacology and ageing and service provision to the elderly with a mental illness.
Objectives:	<ul style="list-style-type: none"> # Describe the common psychiatric syndromes which affect older people, their presentation, differential diagnosis, assessment, basic management and outcomes. # Demonstrate the skills to interview older persons effectively and to assess their mental state with particular reference to cognitive function. # Demonstrate the skills necessary to manage the common psychiatric disorders affecting older people and the sensitivity to the social milieu in which the aged person lives with particular reference to the need to support and assist carers of older persons with psychiatric disorders. # Discuss the range of services available to assist older people with mental health problems in Australia and the way these services are likely to develop in the future.

	<ul style="list-style-type: none"> # Describe the experience of ageing as lived in Australia together with the social, societal and personal implications of the ageing process. # Utilise appropriate referral to other specialists and services (both medical and social) for older people.
Assessment:	Seminar presentation (50%) Submission of a 2,000-word written assignment related to the presentation (50%).
