<b>Subject Overview:</b>	This subject critically examines a range of psychosocial issues – mental health, child abuse and family violence, substance abuse, disability and chronic illness. These experiences will be critiqued using a number of perspectives – including epidemiological, consumer, human rights and social constructivist perspectives. The implications for social work practice will be explored.
<b>Objectives:</b>	At the end of this subject, students should be able to: <ul style="list-style-type: none"> <li># Demonstrate substantive knowledge about a range of issues such as mental health, child abuse and family violence, substance abuse, disability and chronic illness, by drawing on national and international research and epidemiological resources.</li> <li># apply a multidimensional approach to understanding how people respond to these issues</li> <li># appreciate the diversity and complexity of consumer perspectives, as presented throughout the semester</li> <li># Critically analyse different theoretical approaches to understanding these psychosocial issues</li> <li># Identify the implications for social work assessment and practice</li> <li># Critically reflect upon personal and professional values in relation to these issues</li> </ul>
<b>Assessment:</b>	Written essay 3,000 words (60%) - due end of semester Written case study 2,000 words (40%) - due mid semester
