

Ecology and Evolutionary Biology

Year and Campus:	2013																																
Coordinator:	Professor Mick Keough (Department of Zoology) Dr Peter Vesk (School of Botany) Associate Professor Barbara Downs (Department of Resource Management and Geography)																																
Contact:	Email: mjkeough@unimelb.edu.au (mailto:mjkeough@unimelb.edu.au) Email: pvesk@unimelb.edu.au (mailto:barbarad@unimelb.edu.au) Email: barbarad@unimelb.edu.au (mailto:barbarad@unimelb.edu.au)																																
Overview:	The Ecology and Evolutionary Biology major will provide the springboard for students in entering careers or research in the following areas: Ecology, Conservation Biology, Animal Behaviour, Evolutionary Biology, Systematic and Biodiversity, Environmental Consulting. Graduates will be prepared for these pathways by developing skills in survey, experimentation and modelling of ecological and evolutionary processes, which are crucial to being prepared to make contributions in research, education or in consulting roles in natural resources management and environmental consulting industries. This major will integrate knowledge from a range of disciplines from genetics through organismal biology to ecosystem science, by enabling students to complete a sequence of specialist subjects in each, as well as integrated subjects in which the students develop an understanding of the application of ecological methods to solving current problems in evolution, ecology and biodiversity. Students will gain experience preparing them for the workplace by participating in group research projects and working groups.																																
Objectives:	This major will integrate knowledge from a range of disciplines from genetics through organismal biology to ecosystem science, by enabling students to complete a sequence of specialist subjects in each, as well as integrated subjects in which the students develop an understanding of the application of ecological methods to solving current problems in evolution, ecology and biodiversity. Students will gain experience preparing them for the workplace by participating in group research projects and working groups.																																
Structure & Available Subjects:	Completion of 50 points of study at Level 3.																																
Subject Options:	Core subject <table border="1" data-bbox="387 1285 1485 1431"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>ECOL30006 Ecology in Changing Environments</td> <td>Not offered 2013</td> <td>12.50</td> </tr> </tbody> </table> Plus one of <table border="1" data-bbox="387 1485 1485 1805"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>ZOOL30008 Experimental Marine Biology</td> <td>Not offered 2013</td> <td>12.50</td> </tr> <tr> <td>BOTA30006 Field Botany</td> <td>Not offered 2013</td> <td>12.50</td> </tr> <tr> <td>GEOG30022 Rivers: Hydrology and Ecology</td> <td>Not offered 2013</td> <td>12.50</td> </tr> <tr> <td>ZOOL30009 Field Biology of Australian Wildlife</td> <td>Semester 2</td> <td>12.50</td> </tr> </tbody> </table> Plus two electives selected from <table border="1" data-bbox="387 1856 1485 2058"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>BOTA30002 Plant Evolution</td> <td>Semester 1</td> <td>12.50</td> </tr> <tr> <td>BOTA30003 Environmental Plant Physiology</td> <td>Not offered 2013</td> <td>12.50</td> </tr> </tbody> </table>			Subject	Study Period Commencement:	Credit Points:	ECOL30006 Ecology in Changing Environments	Not offered 2013	12.50	Subject	Study Period Commencement:	Credit Points:	ZOOL30008 Experimental Marine Biology	Not offered 2013	12.50	BOTA30006 Field Botany	Not offered 2013	12.50	GEOG30022 Rivers: Hydrology and Ecology	Not offered 2013	12.50	ZOOL30009 Field Biology of Australian Wildlife	Semester 2	12.50	Subject	Study Period Commencement:	Credit Points:	BOTA30002 Plant Evolution	Semester 1	12.50	BOTA30003 Environmental Plant Physiology	Not offered 2013	12.50
