

080CN Master of Psychology (Clinical Neuropsychology)/Doctor of Philosophy

Year and Campus:	2013 - Parkville
CRICOS Code:	037232A
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Level:	Research Higher Degree
Duration & Credit Points:	Students are expected to complete this research in 3.00 years full time, or equivalent part time. Credit Points: 400
Coordinator:	Professor Michael Saling
Contact:	Melbourne School of Psychological Sciences 12th floor Redmond Barry Building (Building 115 Map) Telephone: + 61 3 8344 6377 Email: enquiries@psych.unimelb.edu.au (mailto:enquiries@psych.unimelb.edu.au) Web: http://www.psych.unimelb.edu.au (http://www.psych.unimelb.edu.au)
Course Overview:	<p>There is no mid year entry available for this course.</p> <p>The clinical neuropsychology program aims to provide students with the skills to work as a neuropsychologist. Since its inception in the 1970s, the clinical neuropsychology program has emphasised 'hands on' clinical training in the hospital setting. The breadth of this training experience has steadily increased over the years, and students are placed in a wide variety of settings that cover acute care neurology and neurosurgery, psychiatry, geriatrics, rehabilitation, and paediatrics. The placement experience enjoyed by our students is one of the most extensive in the world.</p> <p>The neuropsychological teaching staff is made up of seven members at the level of Lecturer, Associate Professor or Professor, and a Placement Co-Ordinator. All are full members of the APS College of Clinical Neuropsychologists. The majority are actively involved in the practice of clinical neuropsychology (including supervision of clinical trainees) in a teaching hospital. Collectively, the staff cover the Royal Children's Hospital, St. Vincent's Hospital, the Austin, Heidelberg Repatriation, and Royal Talbot Hospitals (Austin Health), and are therefore well positioned to bring to the teaching situation a high level of clinical and research expertise.</p> <p>The program in clinical neuropsychology aims to provide students with the skills and knowledge necessary for competent practice in a variety of settings, and in relation to a variety of diagnostic problems and management issues. The acquisition of professional skills at a sophisticated level is the ultimate goal of the program. There is a strong emphasis on the need for world-class clinical research, with a significant number of students producing peer-reviewed publications.</p>
Objectives:	The objective of this stream is to provide graduates with the skills to work as professional neuropsychologists. Graduates will obtain a detailed understanding of the affective, behavioural and cognitive manifestations of diseases of the central nervous system, particularly those affecting the brain, in adults and children. Graduates are expected to acquire competence in various approaches to the study of brain disease, including basic and applied clinical sciences, and are expected to acquire an understanding of objective assessment of the many behavioural features of brain diseases. The combined degree program aims to provide students with the skills to work as a professional psychologist and to undertake a substantial piece of original research.
Course Structure & Available Subjects:	<p>This course consists of the coursework and placement components of the Master of Psychology (Neuropsychology) together with a full PhD research thesis in Psychology.</p> <p>Coursework consists of 13 classroom-based subjects taken over the first three years of this four-year course (see below).</p>

Subject Options:

In order to satisfy the requirements of the combined Master of Psychology (Clinical Neuropsychology)/PhD, students must complete the following subjects:

First-year subjects:

Subject	Study Period Commencement:	Credit Points:
PSYC90003 Research Proposal	Not offered 2013	25
PSYC90039 Clinical Neuropsychology Placement 1	Not offered 2013	12.50
PSYC90032 Adult Neuropsychological Disorders	Not offered 2013	12.50
PSYC90006 Basic Interventions	Semester 1	6.25
PSYC90029 Graduate Research Methods	Not offered 2013	6.25
PSYC90030 Principles of Psychological Assessment	Not offered 2013	6.25
PSYC90031 Introduction to Psychopathology	Not offered 2013	6.25
PSYC90007 Cognitive-Behaviour Therapy	Semester 2	6.25
PSYC90082 Clinical Skills in Neuropsychology	Not offered 2013	6.25
PSYC90083 Cognitive Neuroscience and Disorders	Not offered 2013	6.25
PSYC90084 Neuroanatomy for Neuropsychologists	Not offered 2013	6.25

Second-year subjects:

Subject	Study Period Commencement:	Credit Points:
512701 PhD Research	RHD First Half Year, RHD Second Half Year	Not Assigned
PSYC90079 Neuropsychology Placement 2A	Year Long	18.75
PSYC90008 Ethics and Professional Issues	Not offered 2013	6.25
PSYC90033 Neuropsychological Rehabilitation	Not offered 2013	6.25

Third-year subjects:

Subject	Study Period Commencement:	Credit Points:
512701 PhD Research	RHD First Half Year, RHD Second Half Year	Not Assigned
PSYC90080 Neuropsychology Placement 2B	Not offered 2013	18.75
PSYC90042 Child Neuropsychological Disorders	Not offered 2013	6.25
PSYC90010 Mental Health Issues Across the Lifespan	Not offered 2013	6.25

Fourth-year subjects

Subject	Study Period Commencement:	Credit Points:
512701 PhD Research	RHD First Half Year, RHD Second Half Year	Not Assigned

Entry Requirements:	Completion of an Australian Psychological Accreditation Council (APAC) accredited four-year undergraduate sequence in Psychology, consisting of a three-year major in Psychology as part of an undergraduate degree, and a fourth-year Honours specialisation in Psychology of at least H1 standard.
Core Participation Requirements:	For the purposes of considering requests for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements, Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Graduate Attributes:	The program in clinical neuropsychology aims to provide students with the skills and knowledge necessary for competent practice in a variety of settings, and in relation to a variety of diagnostic problems and management issues. The acquisition of professional skills at a sophisticated level is the ultimate goal of the program. There is a strong emphasis on the need for world-class clinical research, with a significant number of students producing peer-reviewed publications.
Professional Accreditation:	Accredited by the Australian Psychological Accreditation Council and recognised by the Psychology Registration Board of Australia
Generic Skills:	<ul style="list-style-type: none"> # Attention to detail # Time management and planning # Written and spoken communication skills # Analysis and critical thinking
