

## BCMB30004 Cell Signalling and Neurochemistry

<b>Credit Points:</b>	12.50												
<b>Level:</b>	3 (Undergraduate)												
<b>Dates &amp; Locations:</b>	This subject is not offered in 2013.												
<b>Time Commitment:</b>	Contact Hours: three x 1 hour lecture, and one x 1 hour tutorial per week. Total Time Commitment: 48 contact hours with an estimated total time commitment of 120 hours.												
<b>Prerequisites:</b>	<p>BSc students</p> <p>Before 2009:</p> <p><b>Biochemistry &amp; Molecular Biology Part A (521-211)</b>  <b>Biochemistry &amp; Molecular Biology Part B (521-212)</b></p> <p>2009 and subsequently:</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>BCMB20002 Biochemistry and Molecular Biology</td> <td>Not offered 2013</td> <td>12.50</td> </tr> </tbody> </table> <p>Note that the pre-2009 subject "<b>Biochemistry &amp; Molecular Biology Part A</b>" and the 2009 subject "<b>Biochemistry &amp; Molecular Biology</b>" are not identical despite having the same subject code. Only the subject "<b>Biochemistry &amp; Molecular Biology</b>" offered in 2009 and subsequently acts as a stand-alone prerequisite.</p> <p>BBiomedicine students</p> <table border="1"> <thead> <tr> <th>Subject</th> <th>Study Period Commencement:</th> <th>Credit Points:</th> </tr> </thead> <tbody> <tr> <td>BIOM20001 Molecular and Cellular Biomedicine</td> <td>Not offered 2013</td> <td>25</td> </tr> </tbody> </table> <p>BBiomedSc Students:</p> <p><b>521-213 Integrated Biomedical Science I AND</b>  <b>536-250 Integrated Biomedical Science II</b></p> <p>Other combinations that provide similar background will be considered by the coordinator.</p>	Subject	Study Period Commencement:	Credit Points:	BCMB20002 Biochemistry and Molecular Biology	Not offered 2013	12.50	Subject	Study Period Commencement:	Credit Points:	BIOM20001 Molecular and Cellular Biomedicine	Not offered 2013	25
Subject	Study Period Commencement:	Credit Points:											
BCMB20002 Biochemistry and Molecular Biology	Not offered 2013	12.50											
Subject	Study Period Commencement:	Credit Points:											
BIOM20001 Molecular and Cellular Biomedicine	Not offered 2013	25											
<b>Corequisites:</b>	None												
<b>Recommended Background Knowledge:</b>	None												
<b>Non Allowed Subjects:</b>	Students cannot enrol in and gain credit for this subject if previously obtained credit for pre-2009 subject <b>(521-304) Hormone and Neurotransmitter Biochemistry</b> .												
<b>Core Participation Requirements:</b>	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: <a href="http://www.services.unimelb.edu.au/disability/">http://www.services.unimelb.edu.au/disability/</a>												
<b>Contact:</b>	<p>Academic Coordinator</p> <p>Assoc Prof Heung-Chin Cheng</p> <p><b><a href="mailto:heung@unimelb.edu.au">heung@unimelb.edu.au</a> (mailto:heung@unimelb.edu.au)</b></p> <p>Administrative Coordinator</p>												

	<p>Ms Irene Koumanelis</p> <p><a href="mailto:i.koumanelis@unimelb.edu.au">i.koumanelis@unimelb.edu.au</a> (mailto:i.koumanelis@unimelb.edu.au)</p>
<b>Subject Overview:</b>	<p>Aberrations in the structure and expression of hormones, growth factors, neurotransmitters and their receptors can give rise to diseases such as cancer and neurodegenerative diseases. To understand the molecular basis of these diseases, it is essential to know how hormones, growth factors and neurotransmitters are synthesised, and how their signals are recognised, amplified and transmitted by intracellular signalling pathways in the target cells.</p> <p>Topics covered include structures of hormone and neurotransmitter receptors, mechanisms of intracellular signal transduction, second messengers and protein phosphorylation-dephosphorylation; regulation of gene expression; molecular basis of drug addiction; different roles of individual neurotransmitters; neurochemistry of sensory transduction, mechanism of neuronal apoptosis and necrosis, molecular basis of neurodegenerative disease, molecular basis of cancer formation and progression and the use and design of protein kinase inhibitors as therapeutics for treatment of cancer and neurodegenerative diseases.</p>
<b>Objectives:</b>	<p>On completion of the subject:</p> <ul style="list-style-type: none"> <li># students should understand the molecular basis of hormone and neurotransmitter actions.</li> <li># the techniques used to investigate the mechanism of hormone action and neurotransmitter functions.</li> <li># how abnormalities in synthesis and intracellular signalling pathways contribute to drug addiction and disease such as cancer and Parkinson's disease.</li> </ul>
<b>Assessment:</b>	<p>3 hour written exam held in examination period (70%); two 1 hour written examinations held during semester (7.5% x 2 = 15%); An essay assessment due mid-semester (15%).</p>
<b>Prescribed Texts:</b>	<p>Basic Neurochemistry 7th edition, Elsevier by Siegel, G.J., Abers, R.W., Brady, S.T. and Price, D.L.</p>
<b>Breadth Options:</b>	<p>This subject is not available as a breadth subject.</p>
<b>Fees Information:</b>	<p>Subject EFTSL, Level, Discipline &amp; Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a></p>
<b>Generic Skills:</b>	<p>On completion of this subject, students should have developed the following generic skills:</p> <ul style="list-style-type: none"> <li># the ability to interpret scientific literature and interpret data from electronic databases.</li> <li># the capacity to integrate knowledge across disciplines.</li> <li># the ability to comprehend a question, evaluate the relevant information and communicate an answer.</li> </ul>
<b>Notes:</b>	<p>Students enrolled in the BSc (pre-2008 BSc), BASc or a combined BSc course will receive science credit for the completion of this subject.</p> <p>Students undertaking this subject will be expected to regularly access an Internet-enabled computer.</p>
<b>Related Majors/Minors/Specialisations:</b>	<p>Animal Cell Biology (specialisation of Cell and Developmental Biology major)          Biochemistry and Molecular Biology          Cell Biology (pre-2008 Bachelor of Science)          Neuroscience          Reproduction and Development (pre-2008 Bachelor of Science)          Reproduction and Development (specialisation of Cell and Developmental Biology major)          Science credit subjects* for pre-2008 BSc, BASc and combined degree science courses          Science-credited subjects - new generation B-SCI and B-ENG. Core selective subjects for B-BMED.</p>
