Contact:	Education Student Centre								
Subject Overview:	A study of normative patterns and individual differences in children's social and emotional development in infancy and early childhood. Key theories, models and research about the effect of biological predispositions such as temperament and contextual factors such as child rearing practices on development will be considered. Emotional expression, regulation and intelligence will be introduced and the attachment process described and discussed along with the interrelationships between developmental domains.								
Objectives:	Information Not Available								
Assessment:	Assignments totalling 2000 words and a 2-hour written examination.								
Prescribed Texts:	Prescribed Texts: Rethinking attachment for early childhood practice (S. Rolfe), Allen & Unwin 2004
